

DESN2000 SOFTWARE ENGINEERING

Dr Morty Al-Banna

Week 7:
Visual Hierarchy & Visual Design

UNSW
SYDNEY

Inspired by Dr Sasha Vassar's DESN2000 lecture slides (2022)

What are we doing today?

1. Information Architecture
2. Visual Hierarchy
3. Colour!
4. Typography
5. Case Studies of WOE and WOW

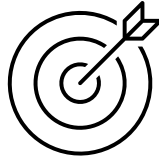

Where are we in the process?

Empathise

Brainstorming
User Research
Desk Research
Other techniques

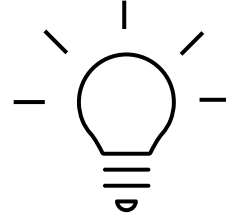

Personas
Scenarios
Journey Maps

Define

What is the problem?

Problem statements

Ideate

What are some solutions?

Themes that emerge from user research, categorise themes to understand initiatives. Think of your goals and features, which will set into the Epics and then break down each epic into user stories and associated acceptance criteria

Prototype

Start preliminary prototype

Test

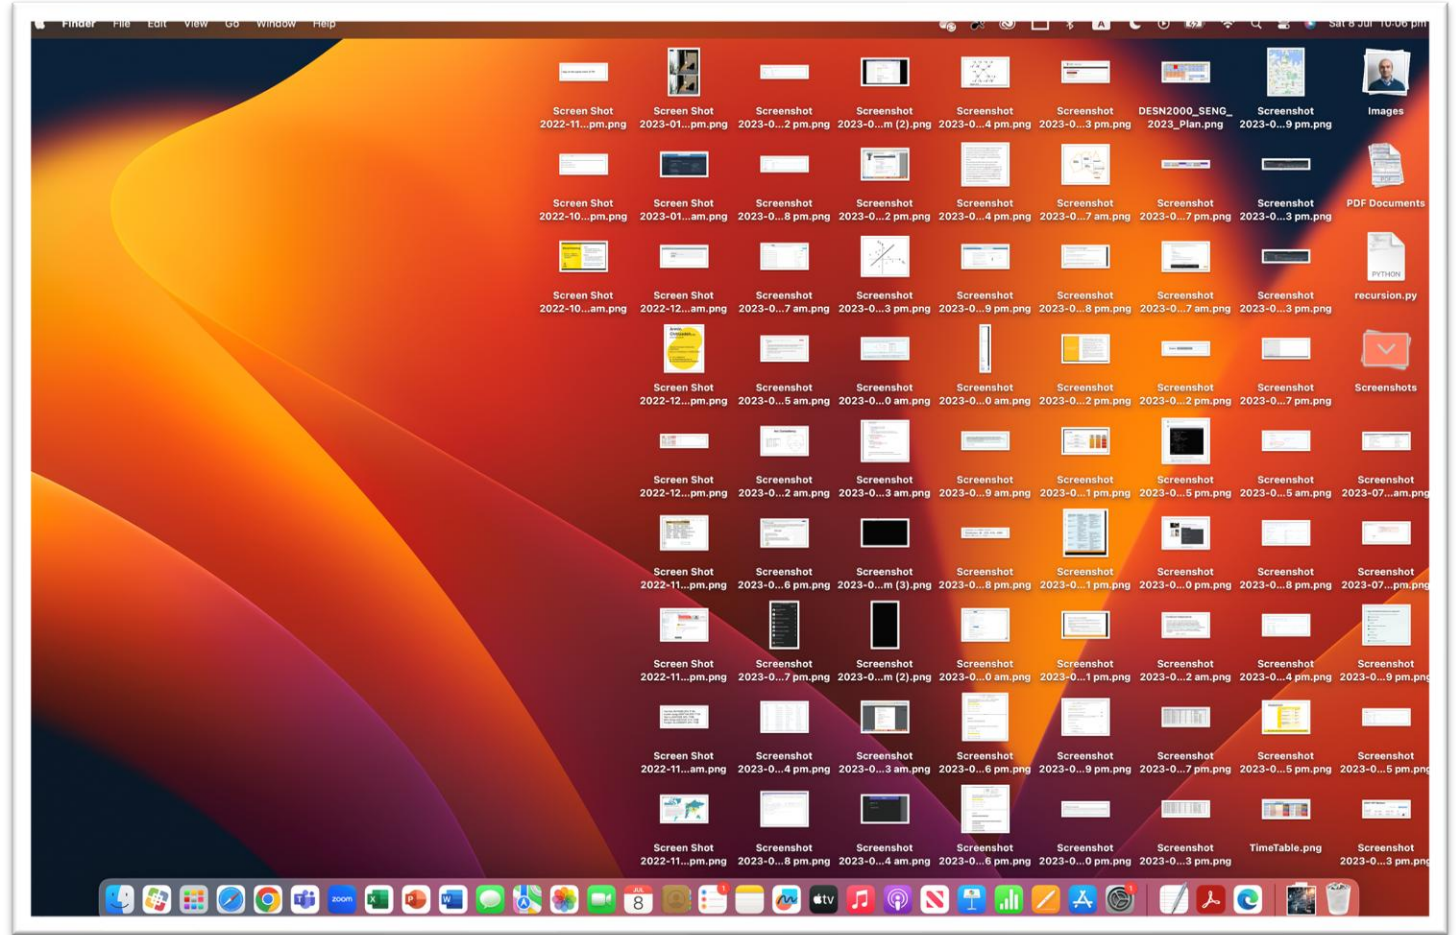

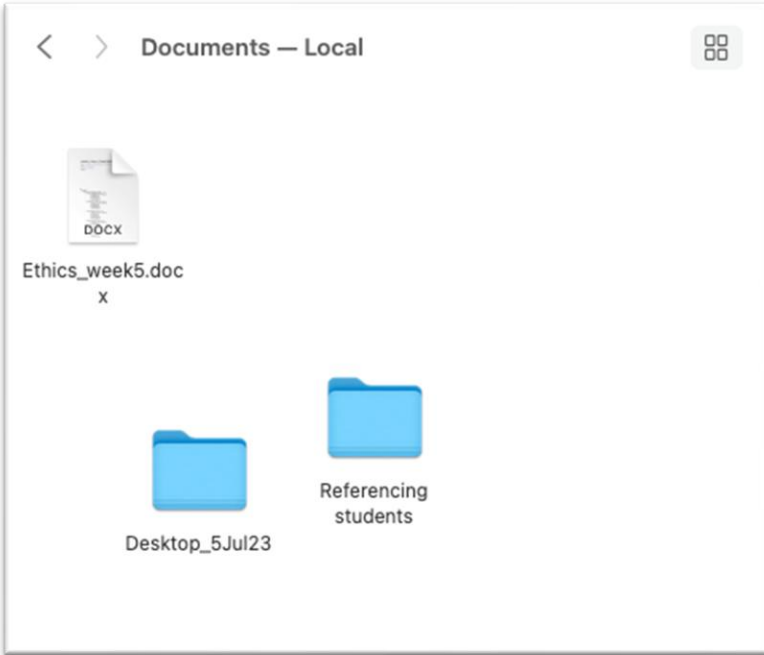

The background is a heavily blurred photograph of a city street. On the left, there are blue-painted structures, possibly a parking lot or a modern building facade. In the center and right, there are various buildings with different colors like yellow, orange, and red. A car is visible in the lower right area. The overall image is out of focus, creating a bokeh effect.

Information Architecture

Information Architecture

- Creation of a structure for a website, interface, app, or any other product
 - Allows a user to understand where they are, where their needed information is, and where they are going to find specific information
- Must consider three factors when designing your information architecture:
 - Users
 - Context
 - Content

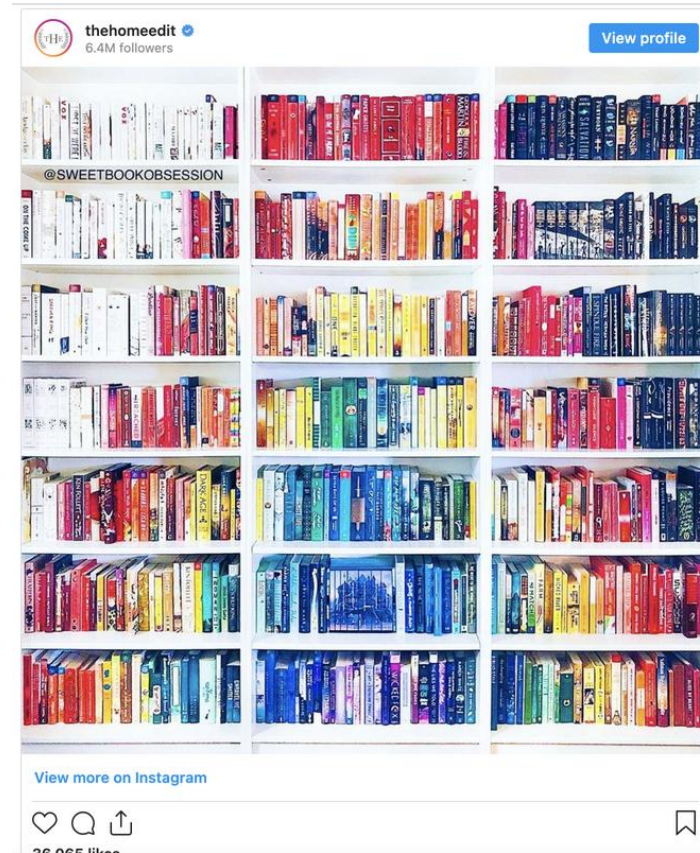

How do we create structure and organisation

How do we create structure and organisation

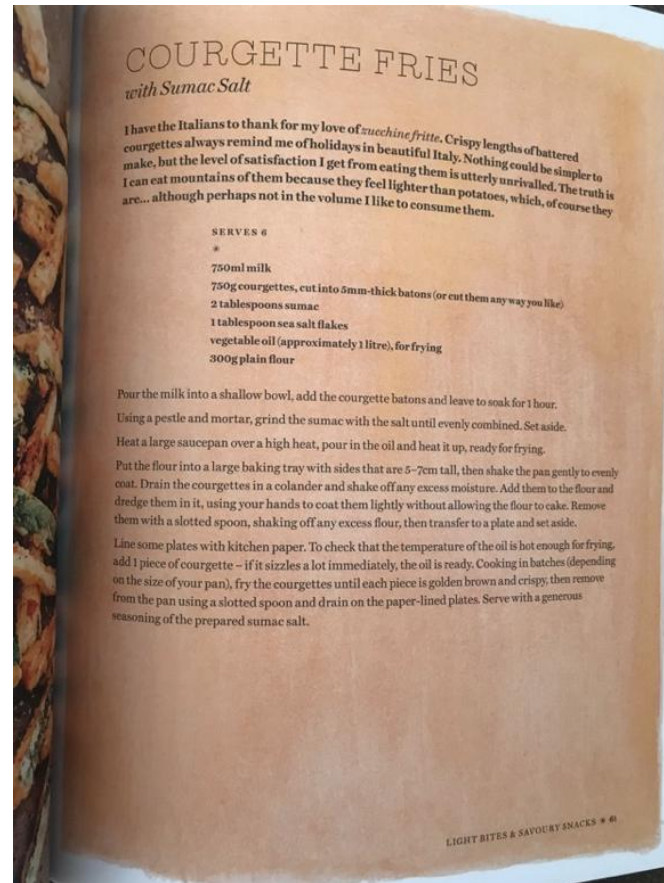

How do we create structure and organisation

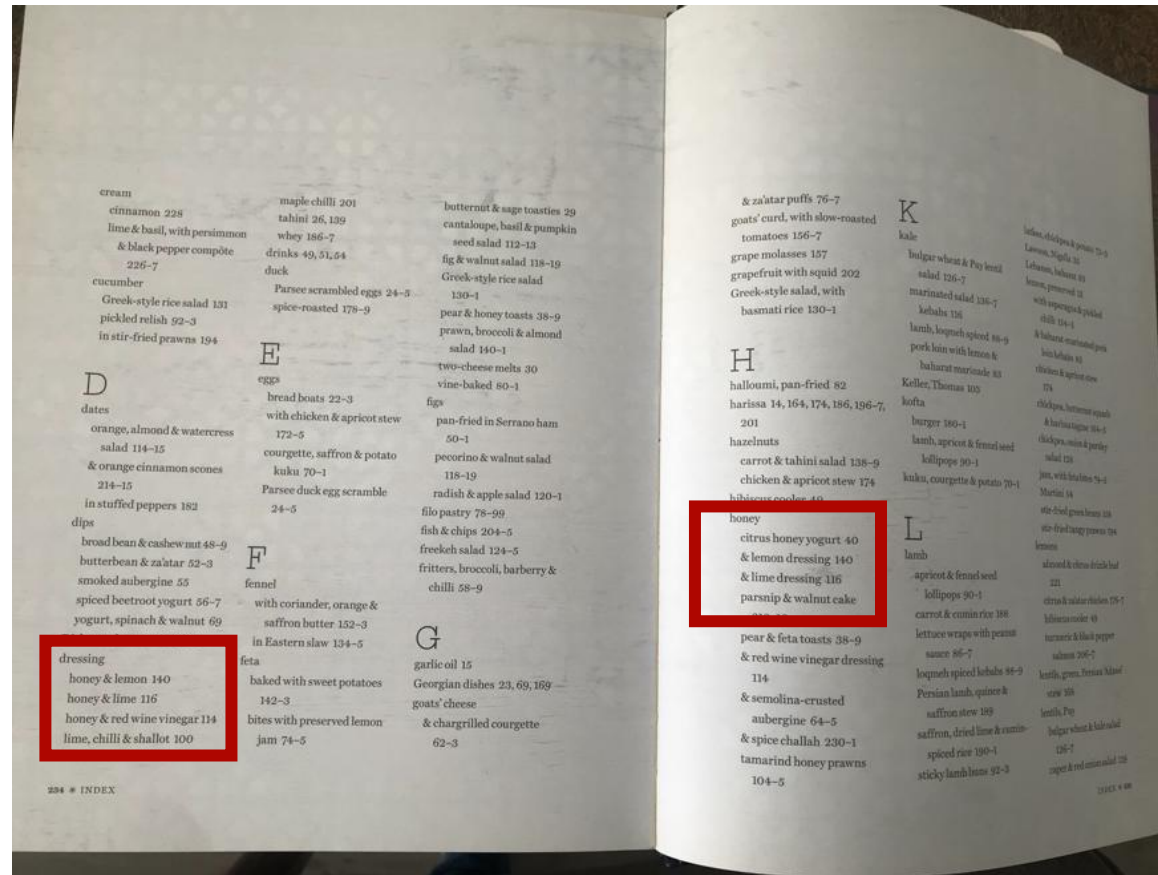

How do we create structure and organisation

How do we create structure and organisation

How do we create structure and organisation

Information Architecture

- The primary focus is the structure itself and secondary the user interface representing the structure on screen (flow diagrams)
- Need to have a good understanding of how people want to relate to the content and functionality contained in the structure (research – personas, scenarios, journey maps, usability tests)
- Need to have a good understanding of the range of content and functionality to be supported by the structure (inventory)

Information Architecture

Keep your priority right

- **Discoverability** over **Novelty**
- **Usability** over **Aesthetics**

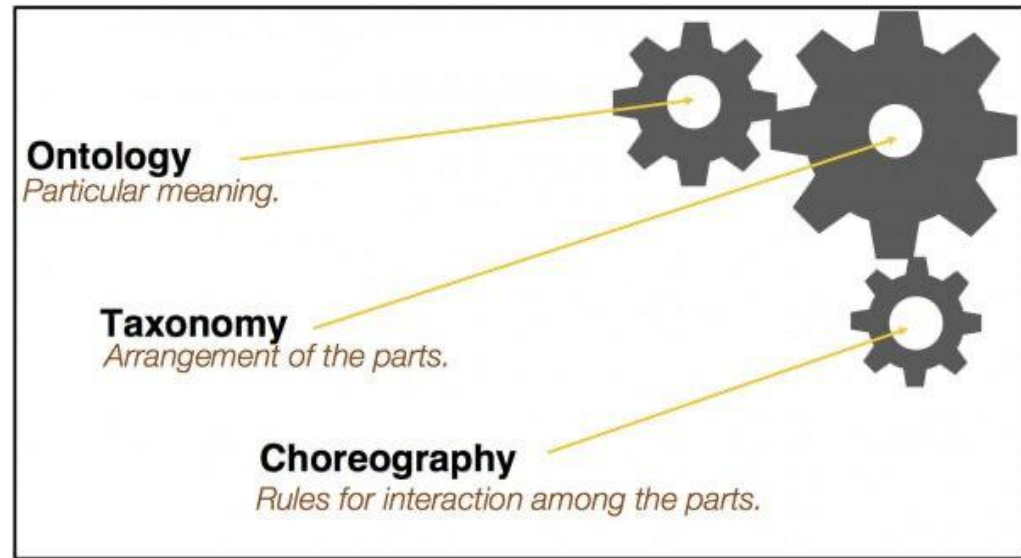

Information Architecture

- User flow – how a user experiences a system over time
- Information architecture – how content is structured, and presented to the user at each touchpoint over time

Information Architecture

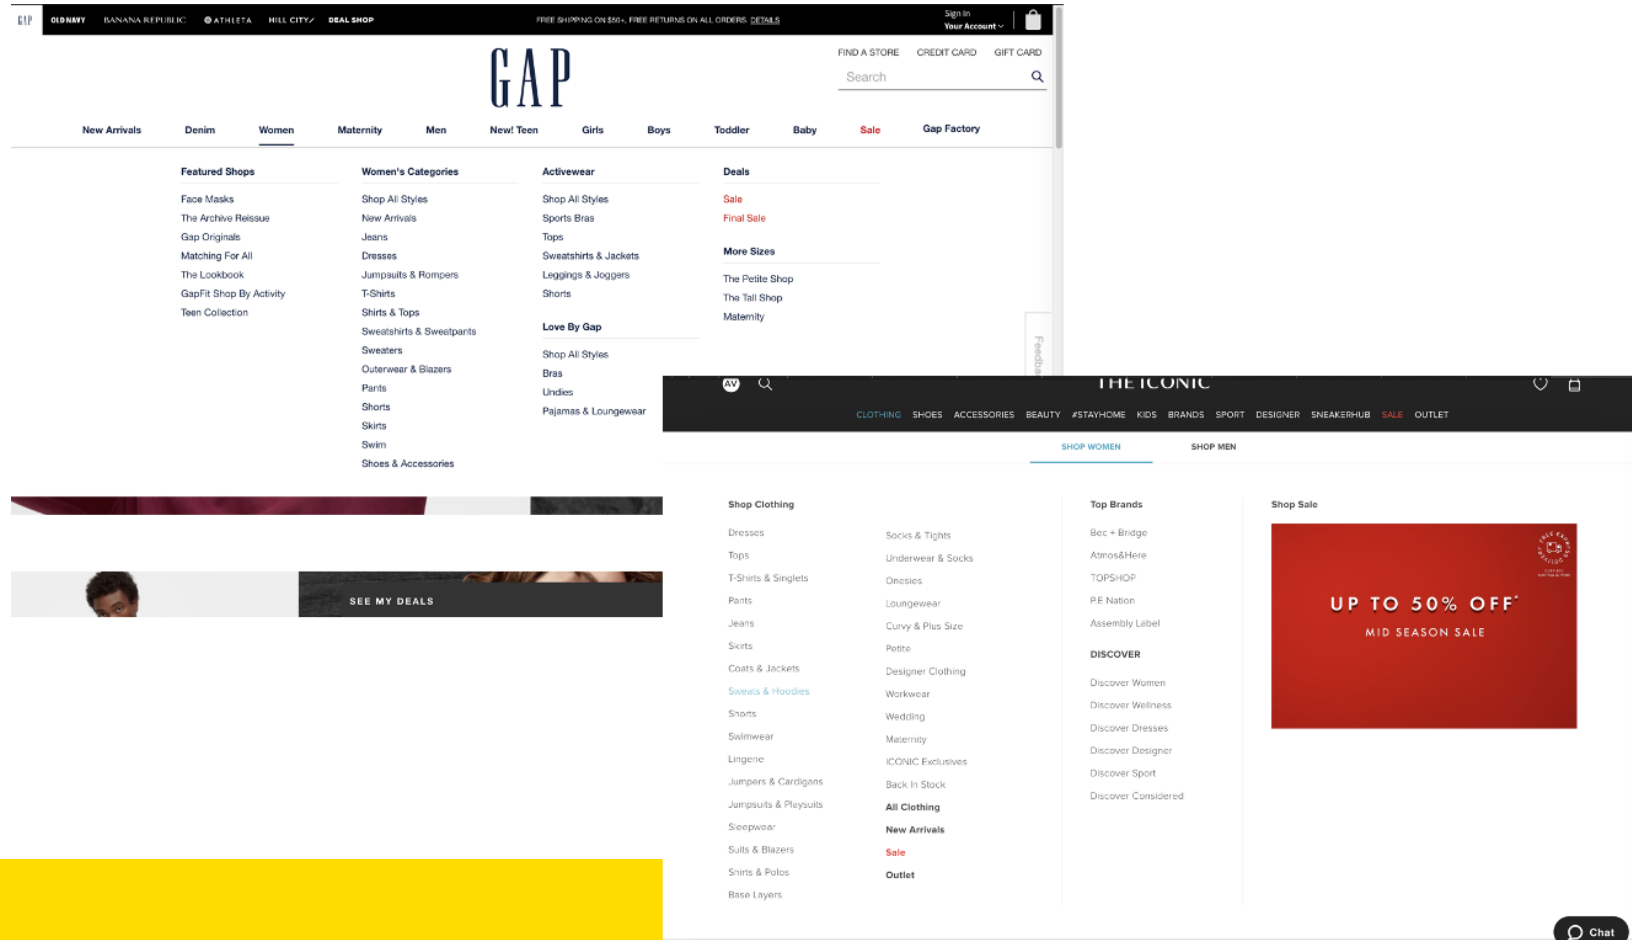

Components

- Ontology (Understanding)
 - Taxonomy (Organising)
 - Choreography (Applying)
-
- Changes based on:
 - Context
 - People
 - Culture

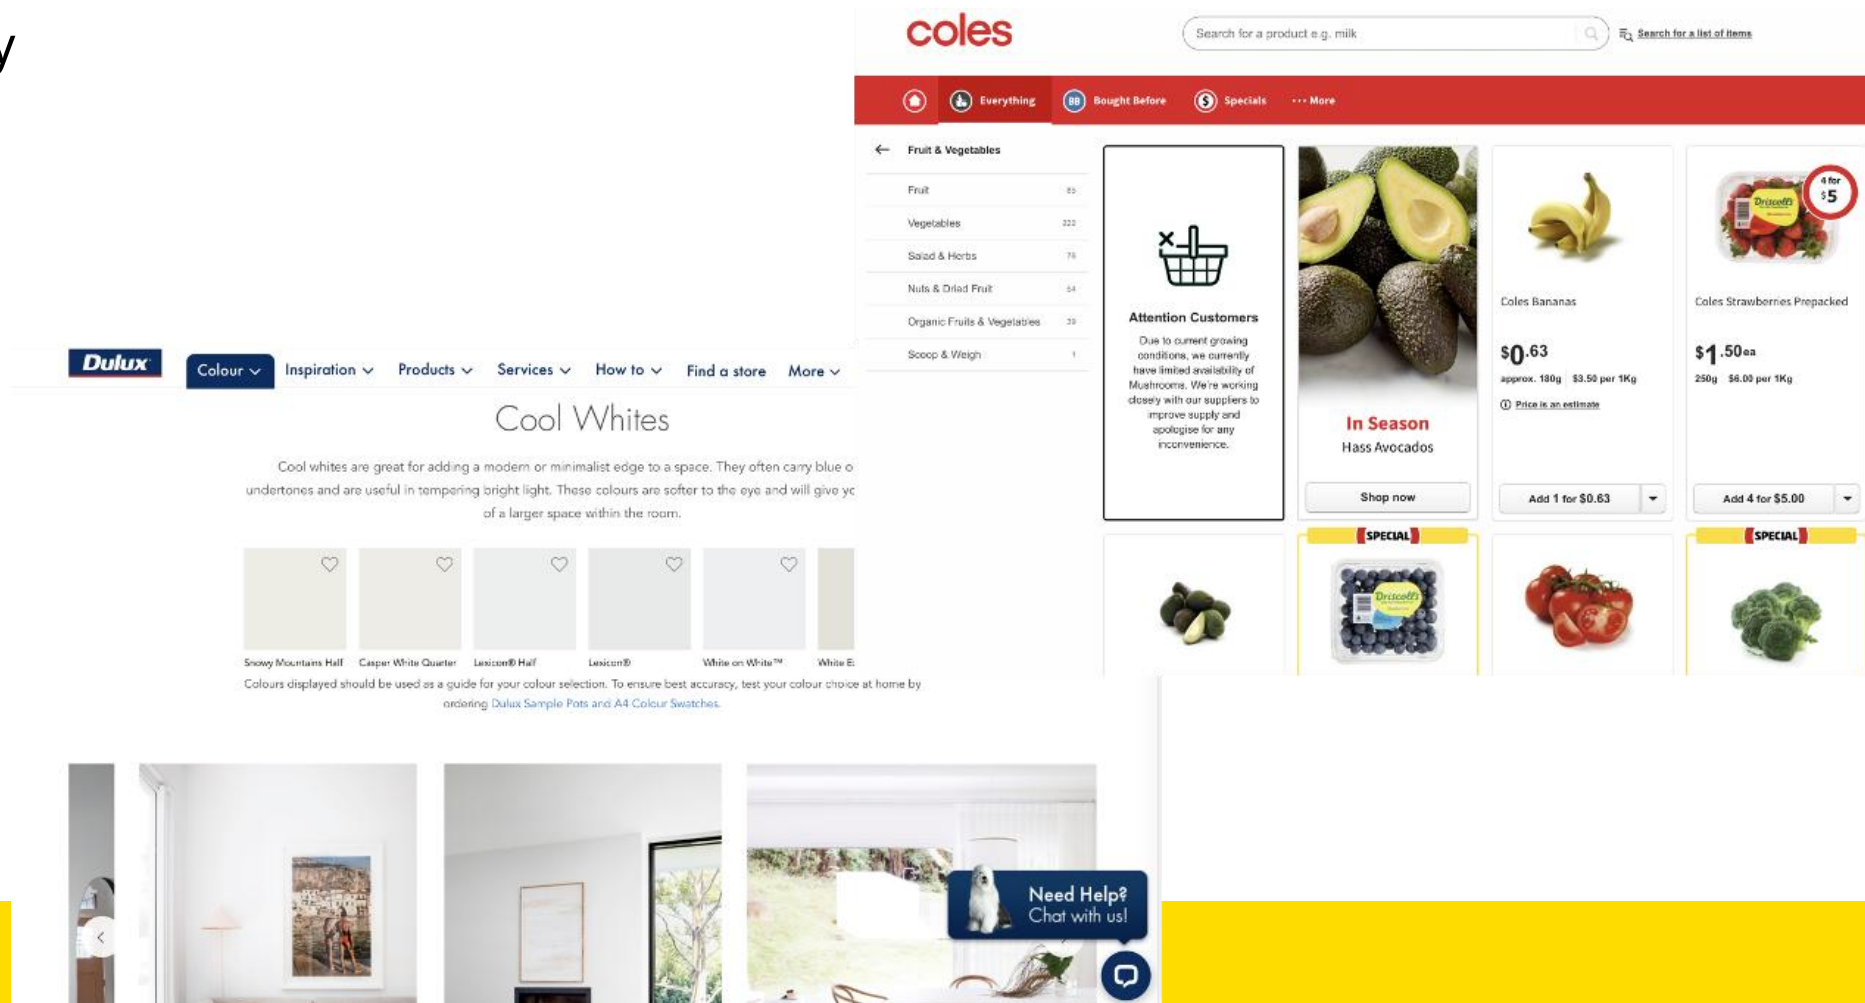

Information Architecture

Ontology

Information Architecture

Taxonomy

Information Architecture

Choreography

- Design with intent for the user

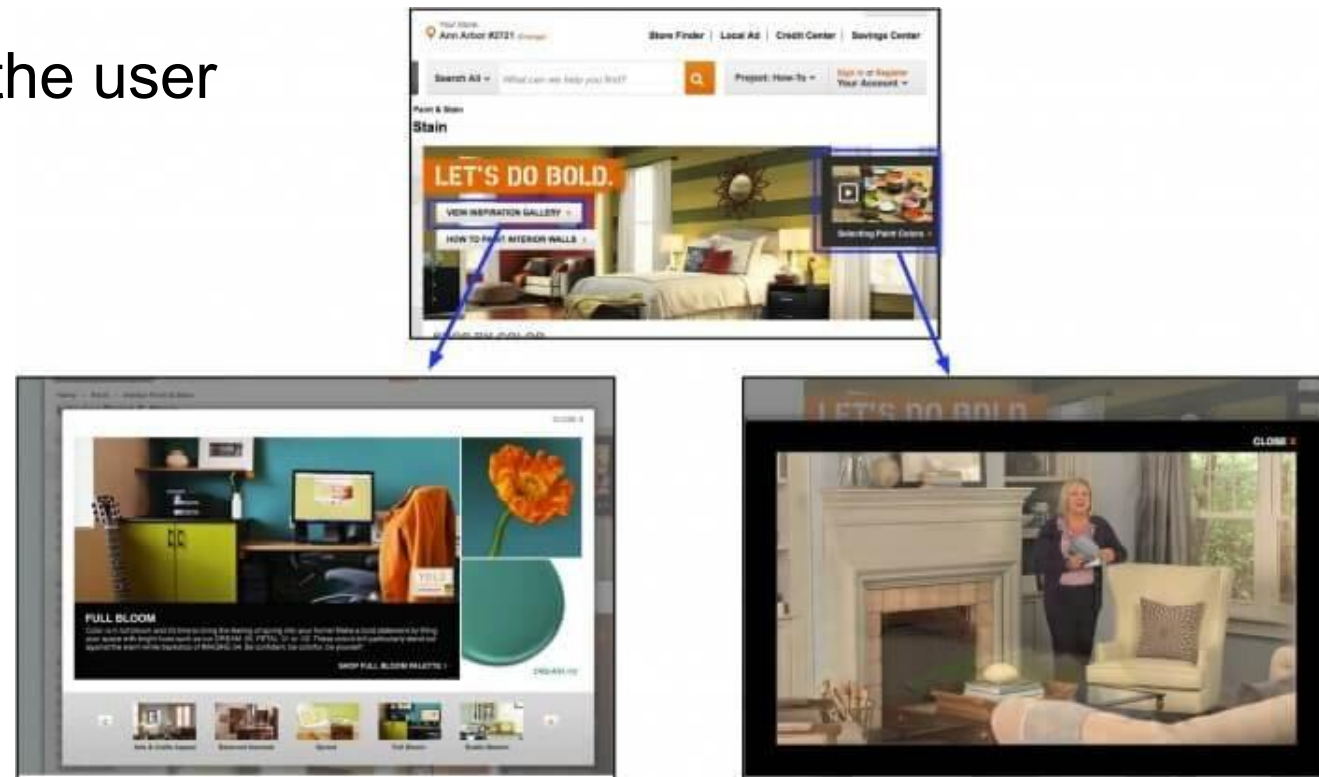

Image credit: <https://understandinggroup.com/ia-theory/understanding-information-architecture>

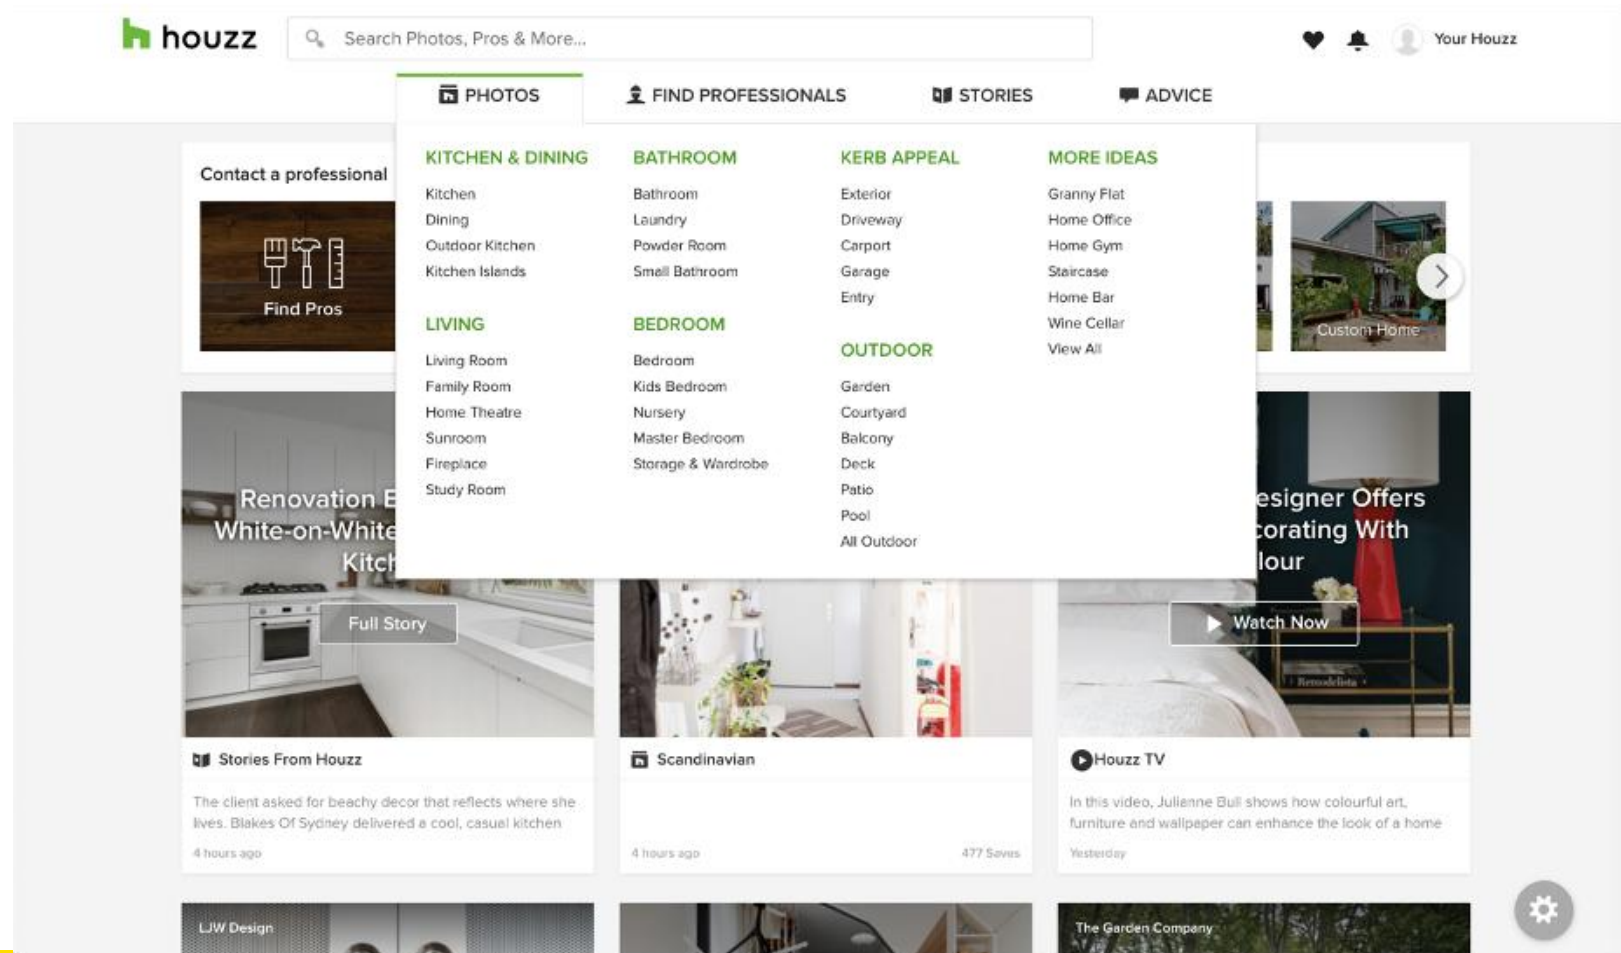

Principles

Information Architecture

“The use of well-established design principles increases the probability that a design will be successful.” [2, p.13]

- There are 8 broad principles of information architecture (web-centric)
 - Principle of objects
 - Principle of choices
 - Principle of disclosure
 - Principle of exemplars
 - Principle of front doors
 - Principle of multiple classification
 - Principle of focused navigation
 - Principle of growth

Principle of Objects

Principle of Choices

Principle of Focussed Navigation

Principle of Focussed Navigation

The image displays two overlapping screenshots of the UNSW Sydney website, demonstrating the principle of focussed navigation. The top screenshot shows a navigation menu with five main categories: Study, Research, Faculties, Engage with us, and About us. Below this, a grid of links is organized into five columns: Study options, Discover UNSW, How to apply, Help centre, and Connect with us. The bottom screenshot shows a similar navigation structure with five main categories: Our story, Excellence, Collaboration, Respect & diversity, and Innovation & impact. Below this, a grid of links is organized into five columns: Our story, Excellence, Collaboration, Respect & diversity, and Innovation & impact. The bottom of the page features a footer with contact information, accreditation details, and a URL.

Principle of Growth

Defining Information Architecture

What should I do?

- Define user goals clearly
 - consider company goals also
- Create a content inventory
 - consider an audit
- Group information
 - card sorting
- Development of common taxonomy
- Define navigation
 - consider using flowcharts
- TEST!

Visual Hierarchy

Visual Hierarchy What is visual hierarchy? The order in which a user process information by importance Allows the mind to group and prioritise elements to give specific order Create direction for the user experience Lack of hierarchy Forces users into scanning patterns “Visual Journey”

Visual Hierarchy

What is visual hierarchy?

- The order in which a user process information by importance
- Allows the mind to group and prioritise elements to give specific order
- Create direction for the user experience

Lack of hierarchy

- Forces users into scanning patterns
 - “Visual Journey”

Visual Hierarchy

Creating hierarchy:

- Size and scale
- Colour and contrast Typographic
- Spacing and Proximity Alignment
- Repetition
- Negative Space

Visual Hierarchy

Creating hierarchy:

- Rule of Odds
- Rule of Thirds
- Golden Ratio
- Perspective
- Focal Point
- Balance
- Randomness
- Texture
- Visual Triangle

Visual Hierarchy

Size and Scale

- Larger design elements will appear more prominently, especially if they are surrounded by smaller elements

Visual Hierarchy

Size and Scale

Size and Scale

The screenshot displays the Amazon Australia product page for 'Mario Party Superstars - Nintendo Switch'. The page is structured to guide the user's eye through various elements:

- Header:** Includes the Amazon Prime logo, delivery location (Alexandra Kingsford 2032), a search bar, and navigation links like 'Hello, Alexandra', 'Account & Lists', 'Returns & Orders', and a shopping cart with 1 item.
- Navigation:** A horizontal menu with categories like 'All', 'Gift Cards', 'Today's Deals', 'Gift Ideas', 'Coupons', 'Sports, Fitness & Outdoors', and 'audible 2 free audiobooks with trial'.
- Breadcrumbs:** A path showing 'Video Games > Nintendo Switch > Games'.
- Product Image:** A large, vibrant image of the game box for 'Mario Party Superstars' featuring Mario and other characters. To the left is a vertical strip of smaller images showing game play.
- Product Title:** 'Mario Party Superstars - Nintendo Switch' in a large, bold font.
- Brand and Platform:** 'Brand: Nintendo' and 'Platform: Nintendo Switch' are clearly displayed.
- Ratings:** A star rating of 4.5 out of 5 with '88 ratings'.
- Price:** The current price is '\$63.99', marked down from the 'RRP: \$79.95' (a 20% discount).
- Availability:** 'In stock.' and 'FREE delivery available Today by 9 PM. Order within 2 hrs 8 mins'.
- Quantity:** A dropdown menu set to '1'.
- Buttons:** 'Add to Cart' and 'Buy now' buttons are prominently placed.
- Additional Info:** A section titled 'About this item' lists features like '100 classic minigames' and 'Superstar collection of minigames'.
- Footer:** Shipping and seller information: 'Ships from Amazon' and 'Sold by ACSTechnology'.

Visual Hierarchy

Size and Scale

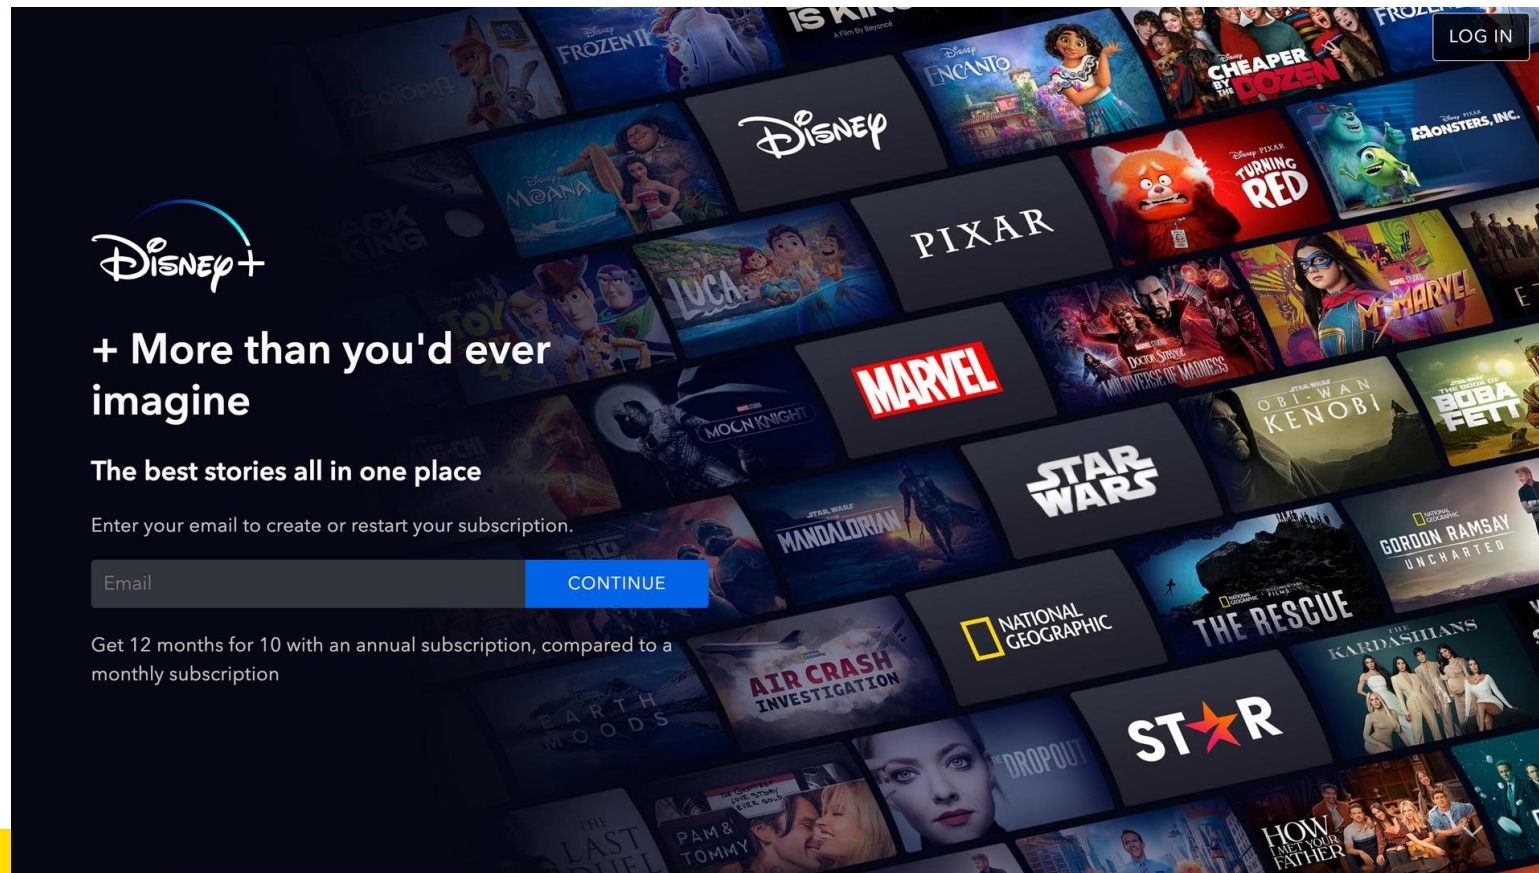

Visual Hierarchy

Colour and Contrast

- **Brighter elements** will appear more prominent in a design, in addition to elements with a higher level of contrast in comparison to the surrounding elements

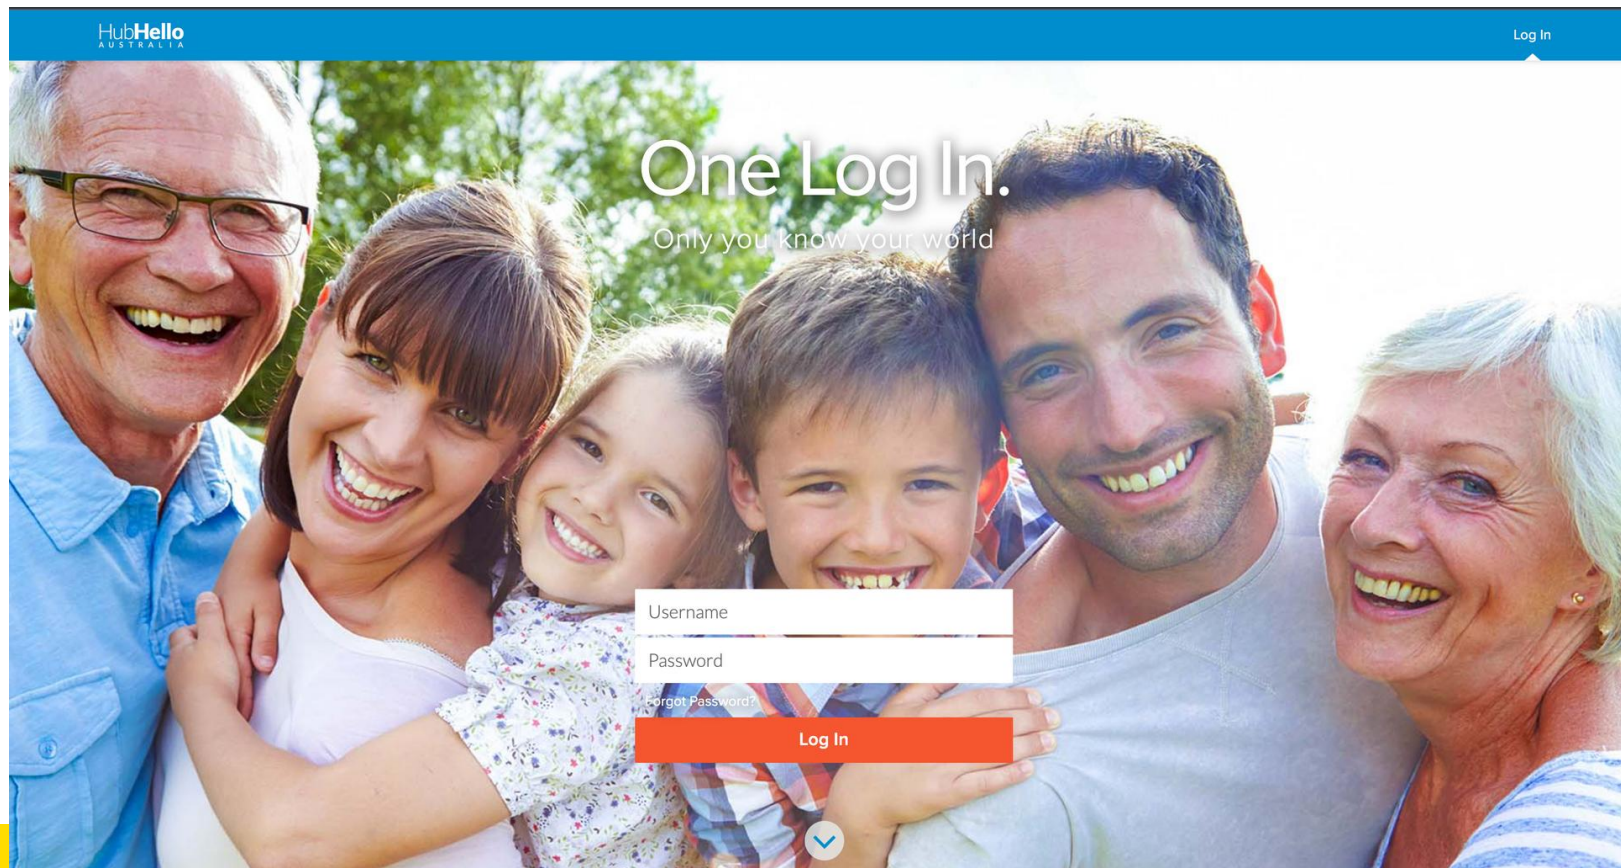

Visual Hierarchy

Colour and Contrast

Visual Hierarchy

Colour and Contrast

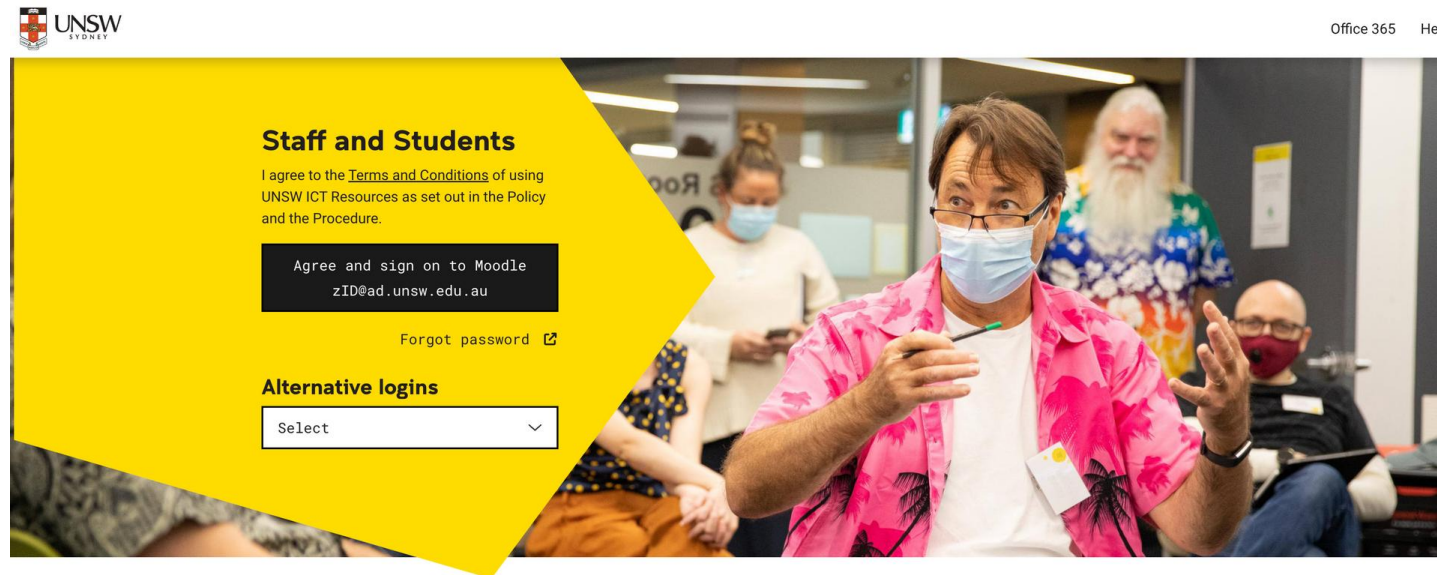

Visual Hierarchy

Typographic

- **Different size and weight** of text can be used to create a hierarchy

Visual Hierarchy

Typographic

Welcome to the UNSW Moodle platform.

Moodle is an open-source learning management system that is used to deliver blended and online courses throughout UNSW.

Highlights

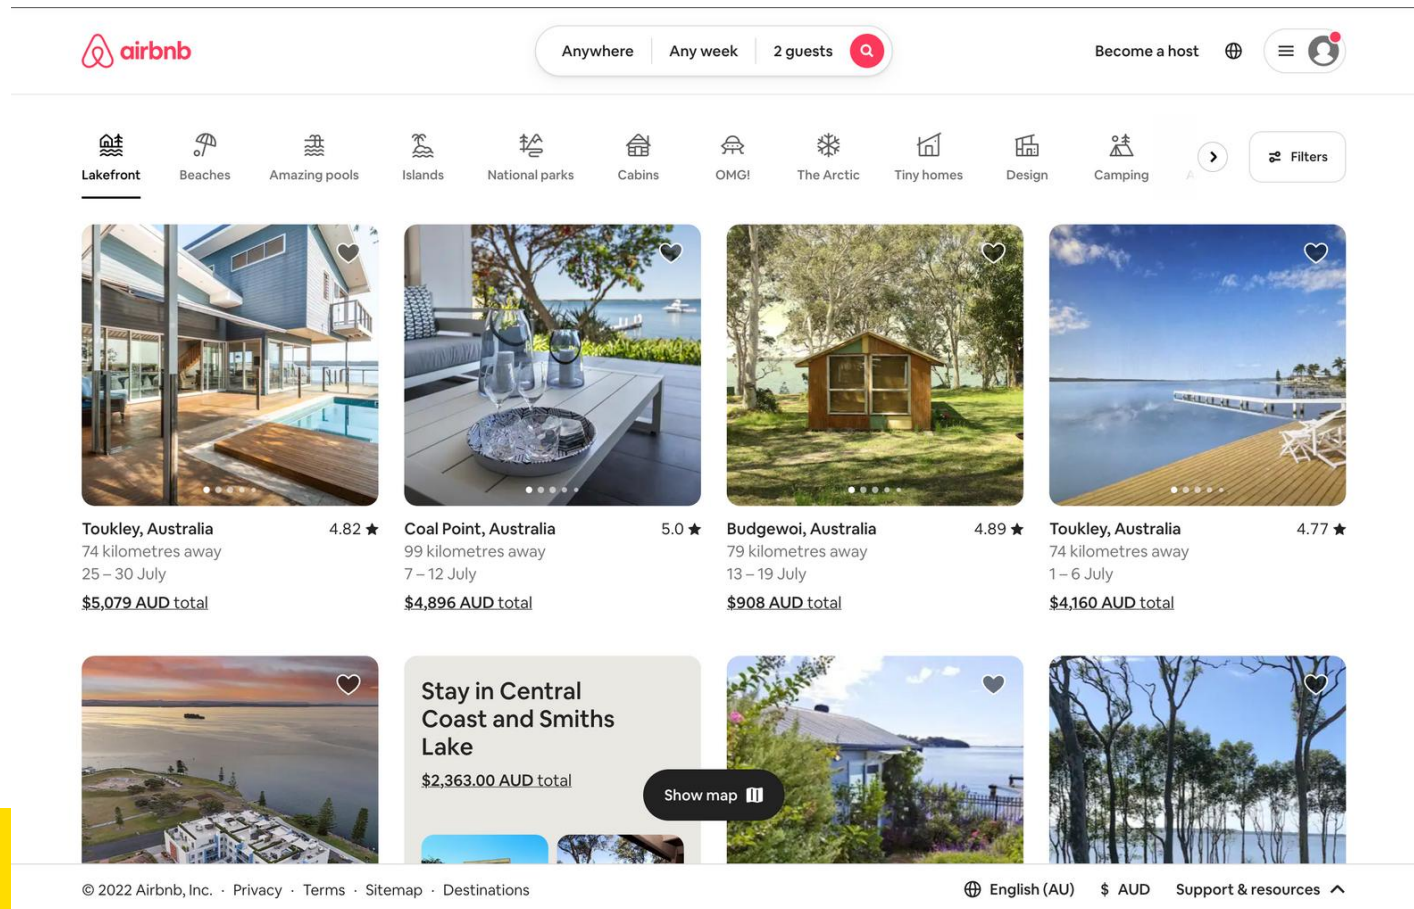

Visual Hierarchy

Spacing and Proximity

- Grouped elements will appear to be related to each other

Visual Hierarchy

Spacing and Proximity

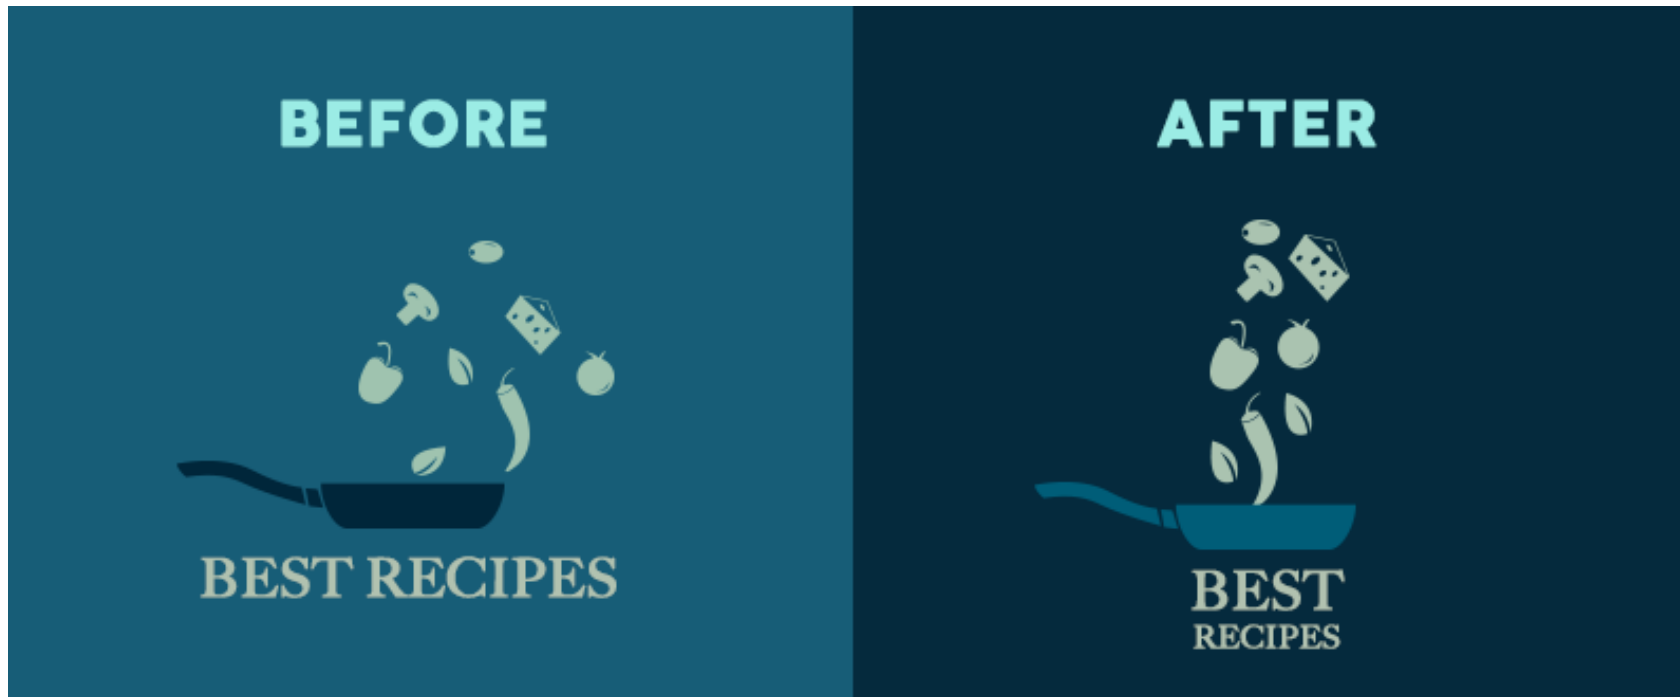

Visual Hierarchy

Alignment

- Things that aligned in a similar way, will give the impression of similar importance

Visual Hierarchy

Alignment

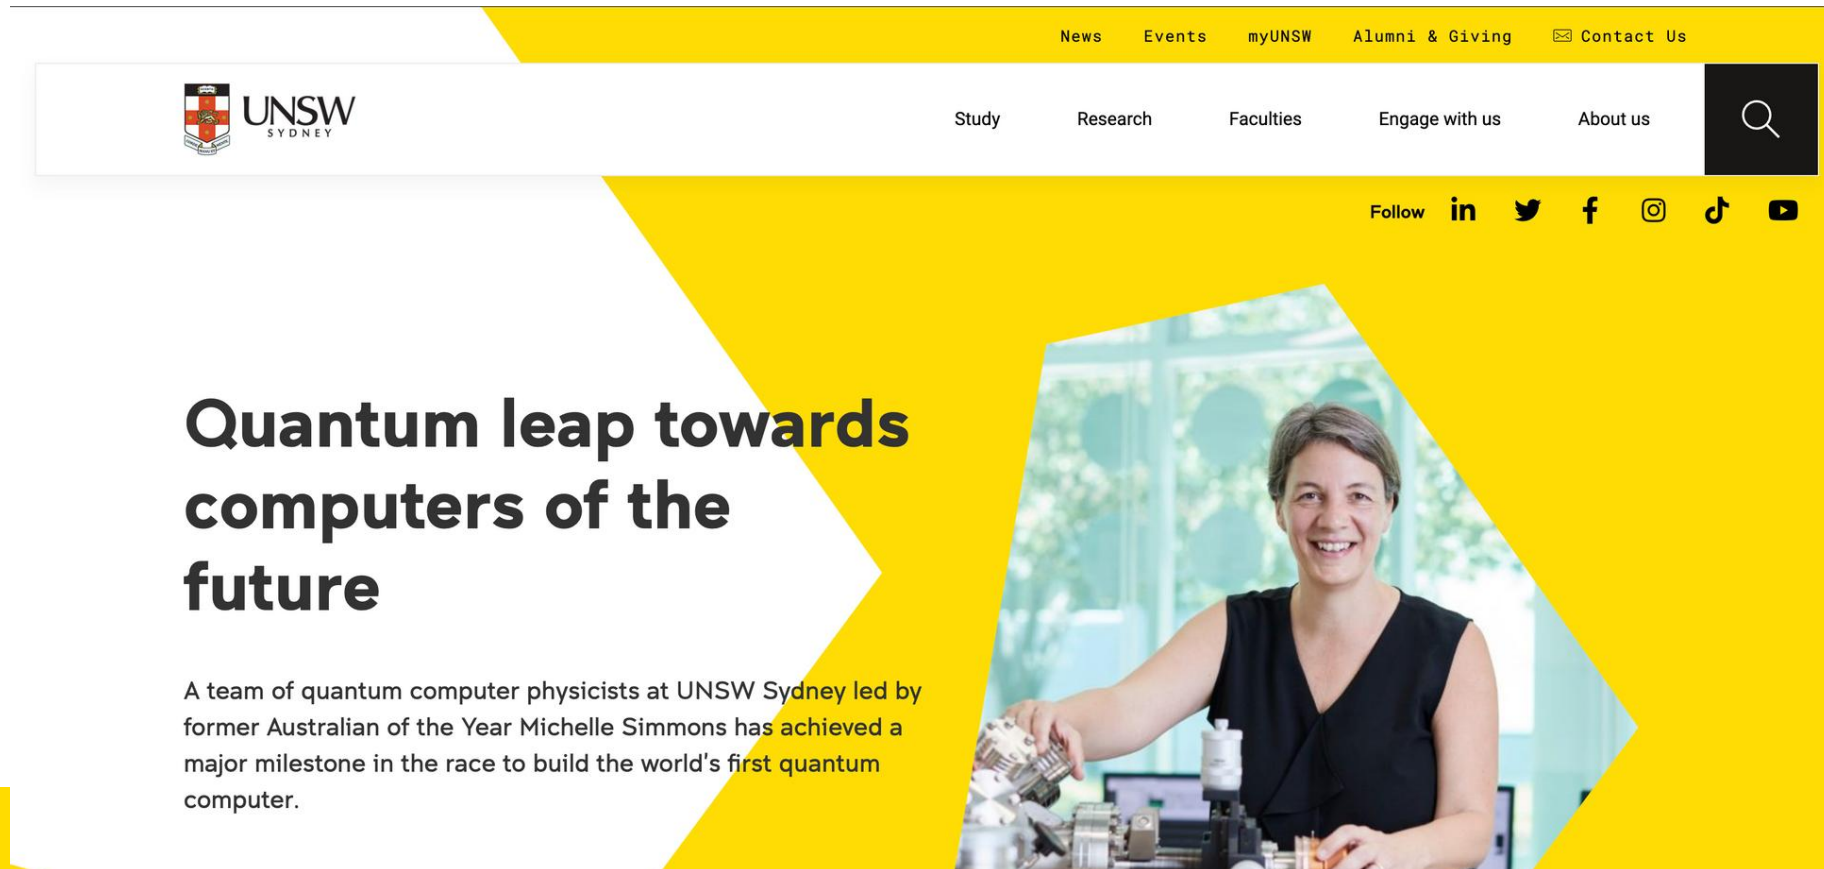

Visual Hierarchy

Repetition

- Repetition creates patterns that users learn to look for - things like the same menu headers throughout the interface

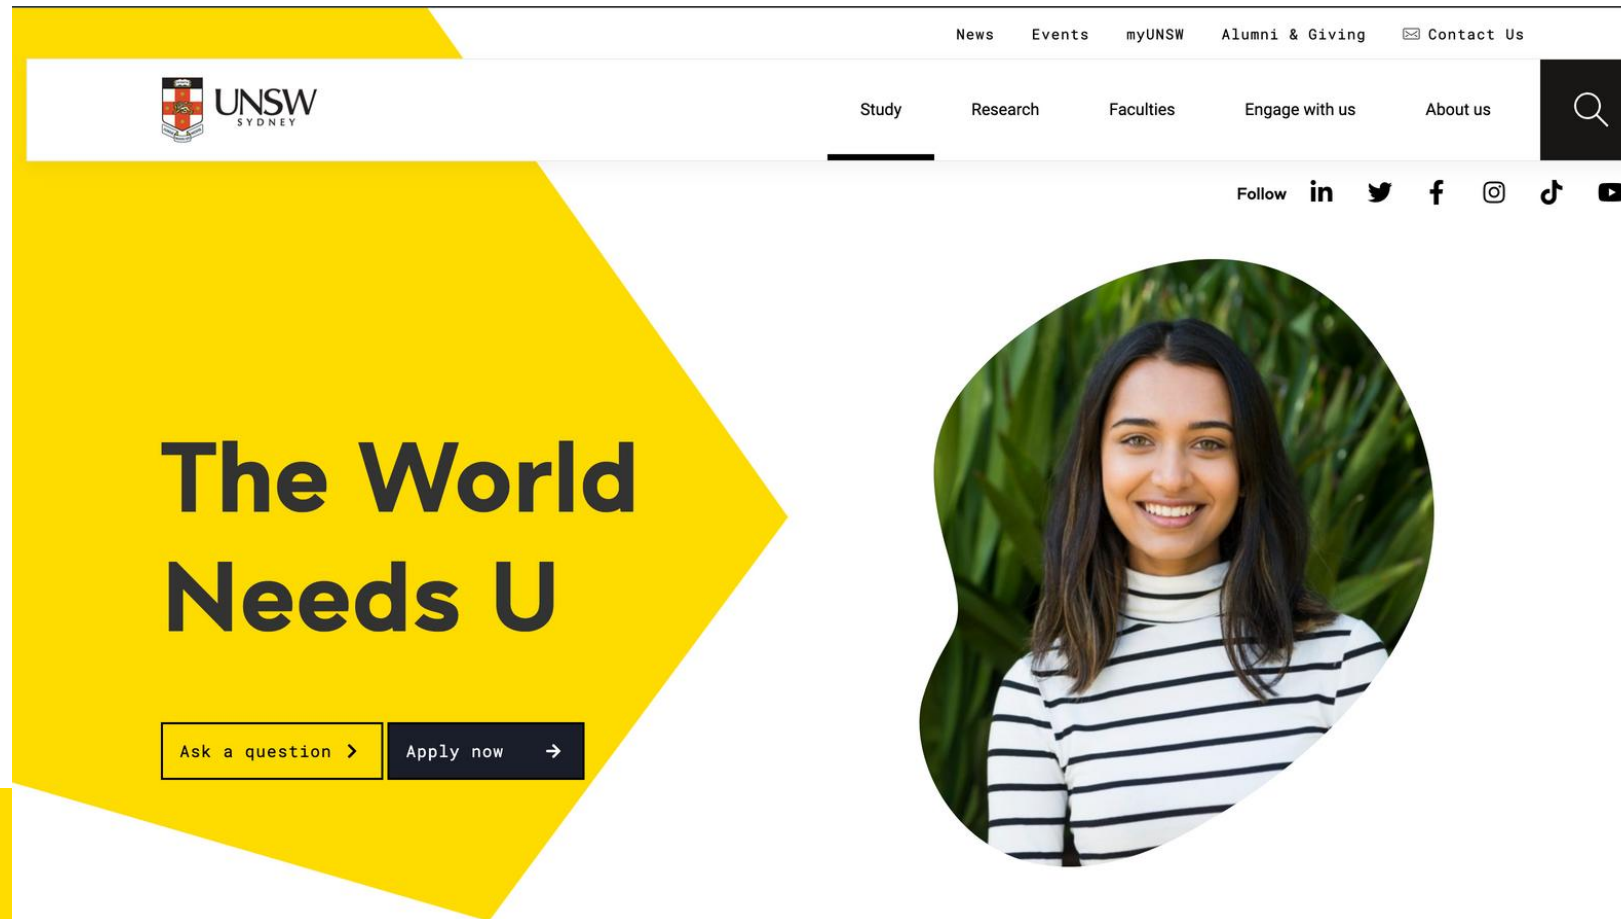

Visual Hierarchy

Repetition

Visual Hierarchy

Repetition

Visual Hierarchy

Repetition

The screenshot displays the UNSW Sydney website homepage, illustrating visual hierarchy and repetition. The header features the UNSW Sydney logo on the left and navigation links (LOGIN, SEARCH, MENU) on the right. Below the header is a large banner image of a modern building. A horizontal navigation bar contains five links: STUDY WITH US, NEW TO UNSW RESEARCH, FIND A RESEARCHER, RESEARCH INTEGRITY, and 2025 STRATEGIC INITIATIVES. The main content area is organized into a grid of eight research-related topics, each with a representative image and a brief description. A yellow sidebar on the right highlights 'QUICK FACTS', stating that UNSW is one of the world's top 50 universities (ARTU) and ranked 2nd in the Go8 for both ARC (\$68.8M) and NHMRC (\$121M) funding announced in 2021. A feedback button is located at the bottom of the sidebar.

Feedback

Visual Hierarchy

Negative space

- The empty space around the element can make it look more important

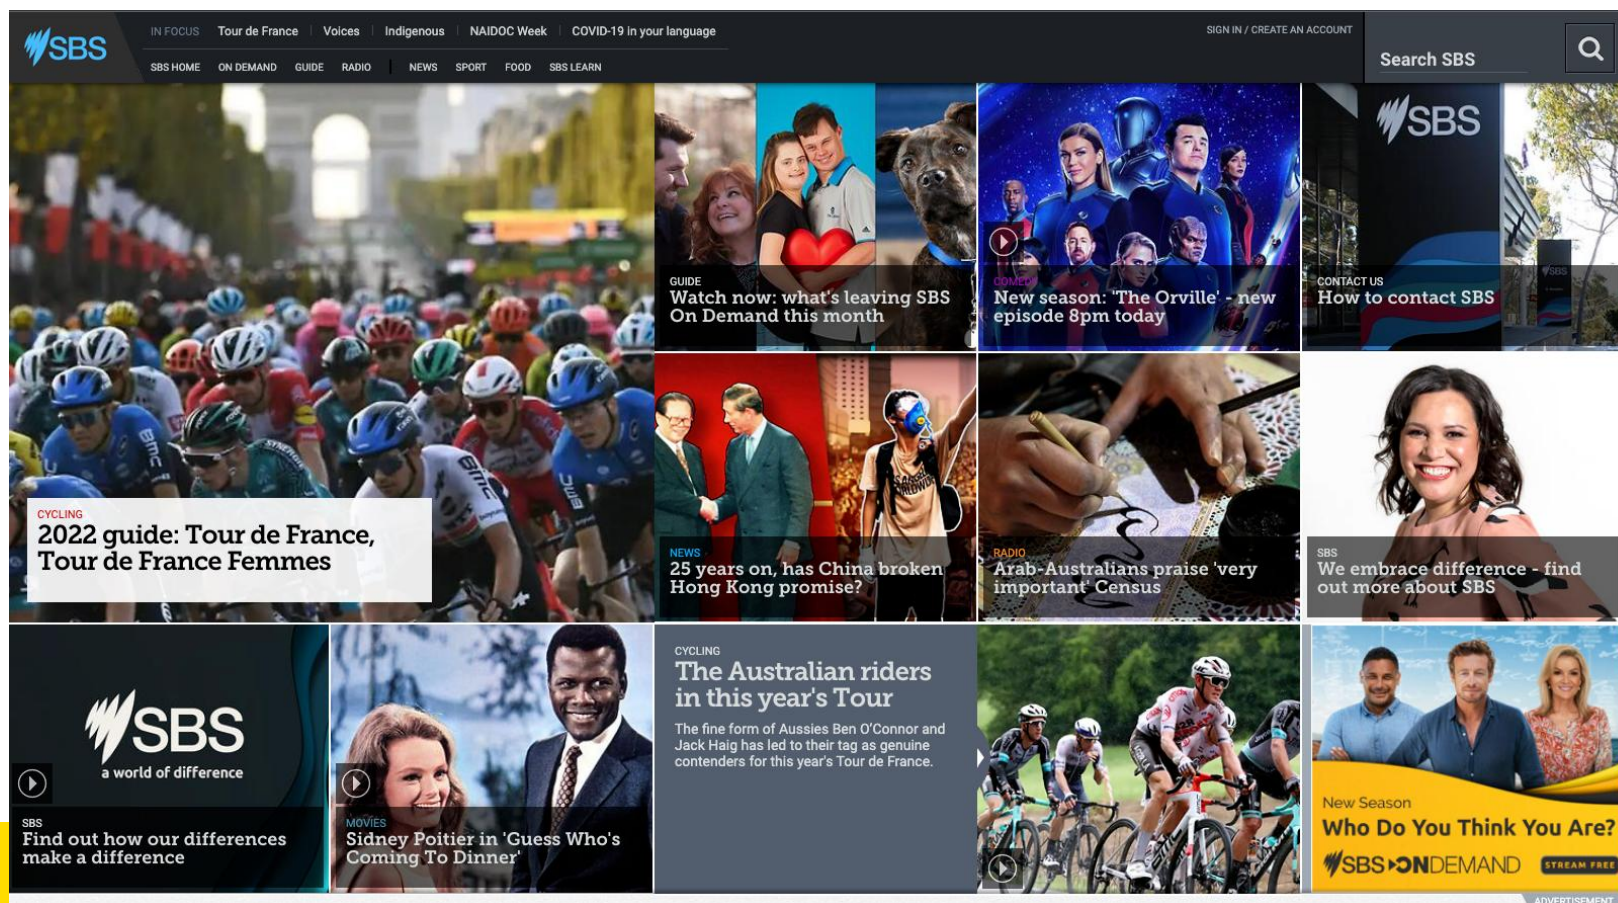

Visual Hierarchy

Negative Space

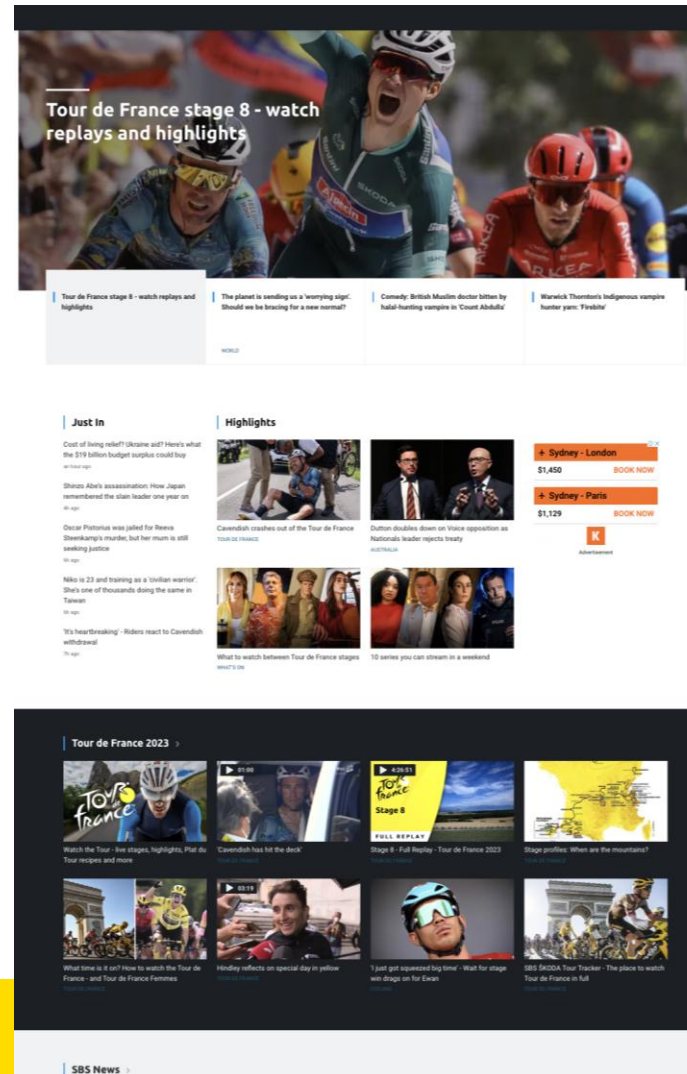

Visual Hierarchy

Negative Space

Visual Hierarchy

Negative Space

Visual Hierarchy

Rule of Odds

Odd number of elements is often more aesthetically pleasing than an even amount. Consider an element surrounded by an even number of elements.

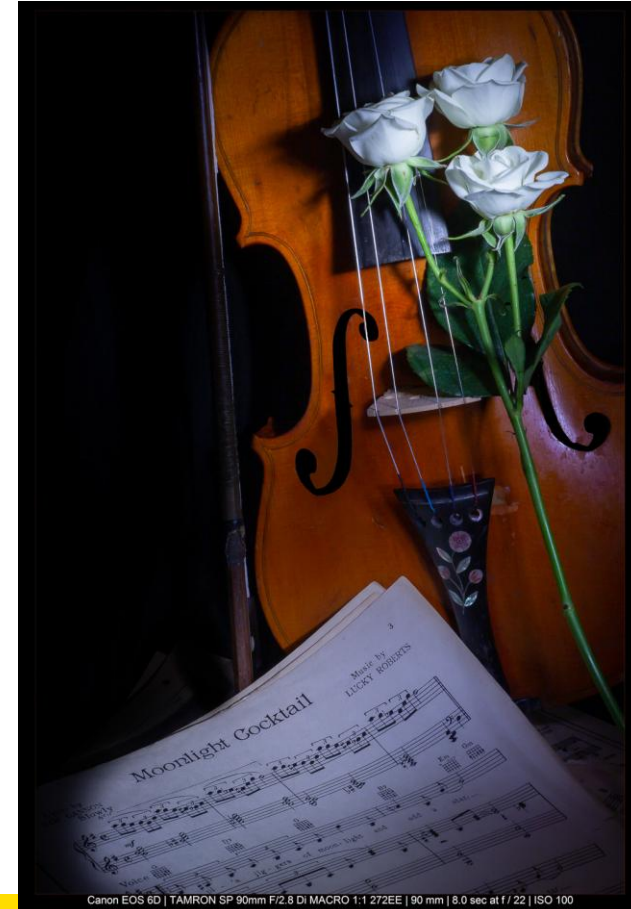

Image credit: <https://digital-photography-school.com/the-rule-of-odds-in-photography-an-easy-trick-for-better-compositions/>

Visual Hierarchy

Rule of Thirds

- Dividing an image into thirds both horizontally and vertically and placing important elements where those invisible lines intersect gives more prominence
 - Be careful and use pending context of what you are trying to show/do!

Visual Hierarchy

Rule of Thirds

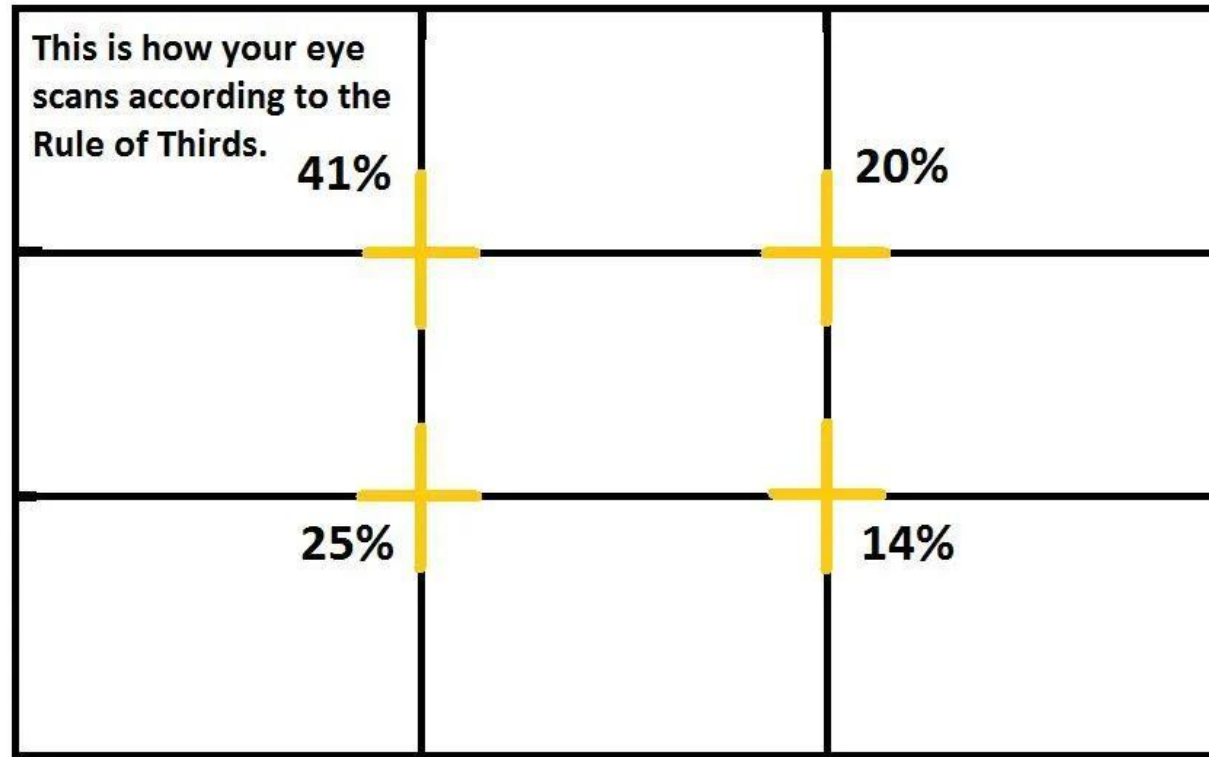

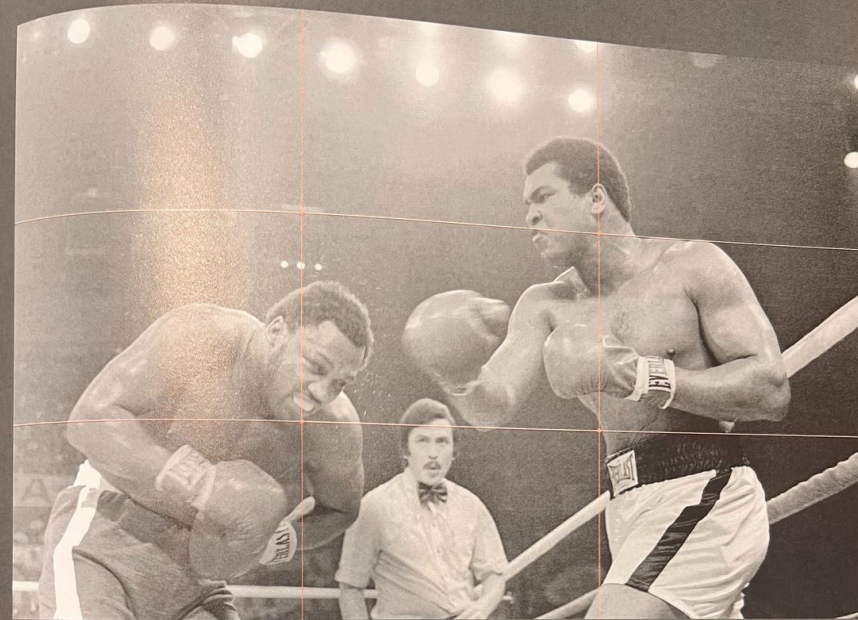

Image Credit: <https://www.interaction-design.org/literature/article/the-rule-of-thirds-knowyour-layout-sweet-spots>

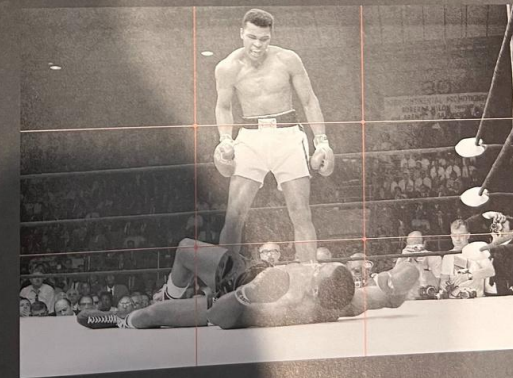

Visual Hierarchy

Rule of Thirds

William Lidwell, Kritina
Holden, Jill Butler
"Universal Principles of
Design" Rockport Publishing
2010

This photograph (above) from the Muhammad Ali–Joe Frazier fight in Manila, Philippines (1975) makes excellent use of the rule of thirds, placing the heads of both fighters at opposing intersections on the grid.

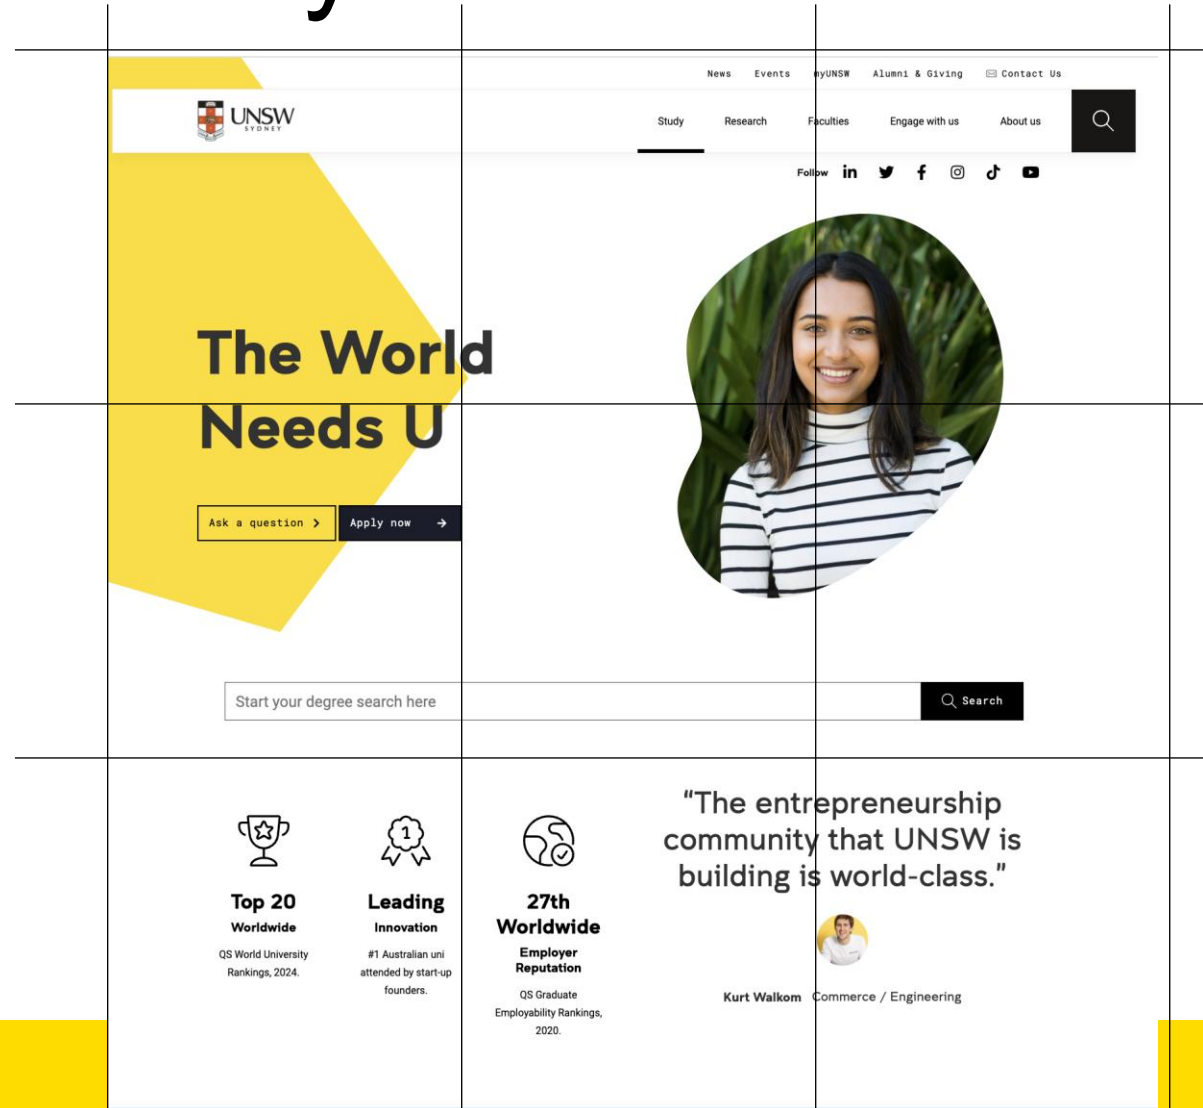

This photograph (right) from the Muhammad Ali–Sonny Liston fight in Lewiston, Maine (1965), by contrast, is an excellent example of when not to use the rule of thirds—strong primary element that is reinforced by the surrounding space.

Rule of Thirds 209

Visual Hierarchy

Rule of Thirds

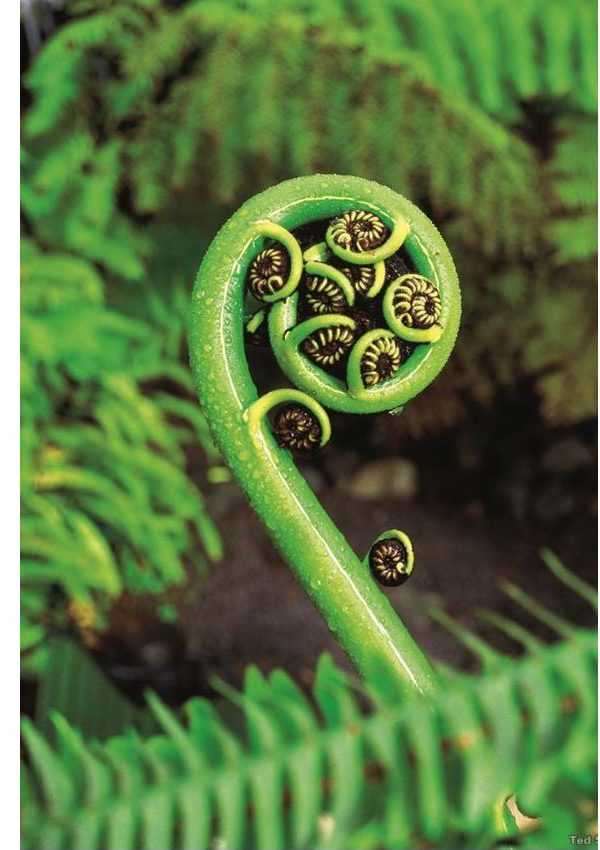

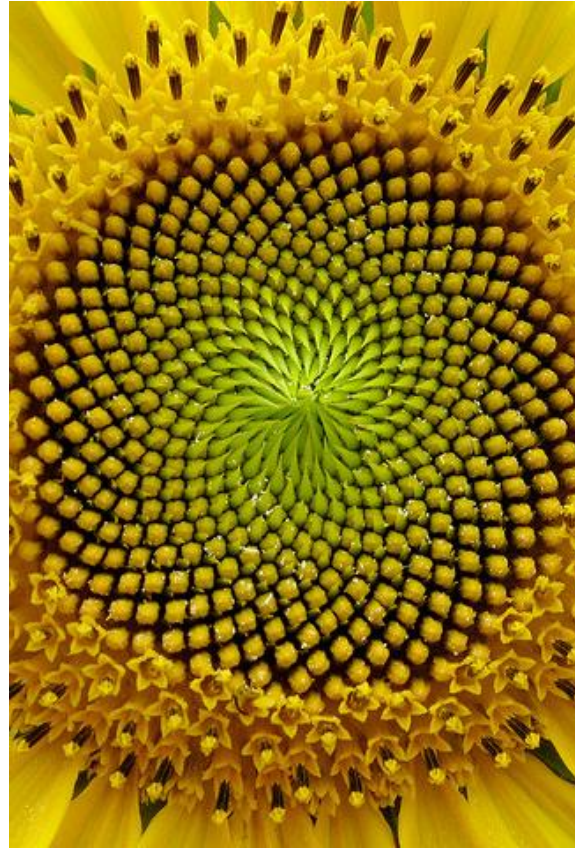

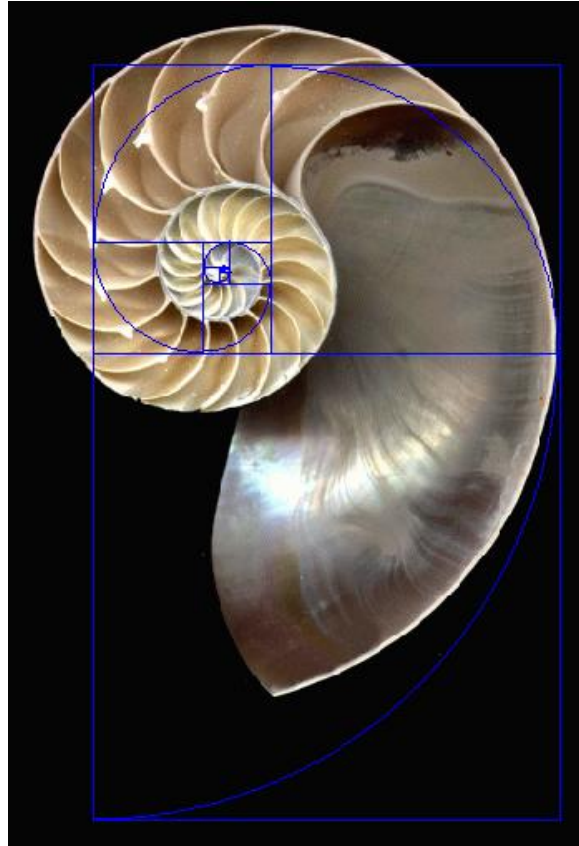

Visual Hierarchy

Golden Ratio – the divine proportion

- Golden Ratio is **1:1.618**
 - A ratio within the elements of a form such as height to width, approximating 0.681
 - often found in nature
 - human eye is drawn to things with this ratio

Visual Hierarchy

Golden Ratio – in nature

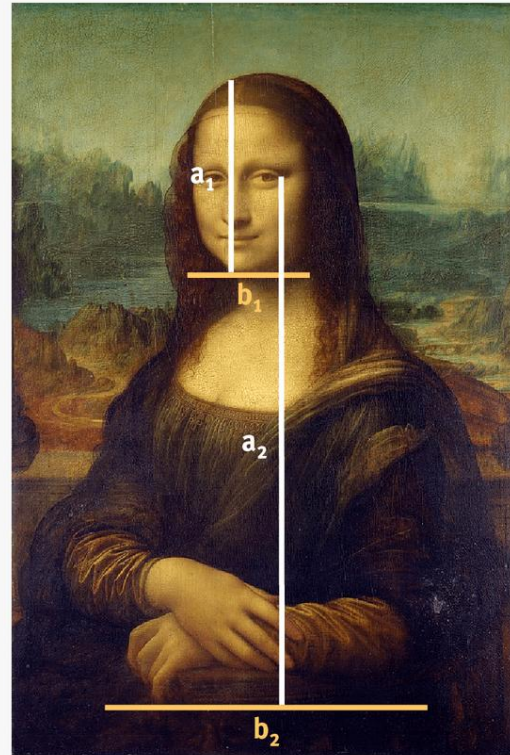

<https://www.goldennumber.net/nautilus-spiral-golden-ratio/>

https://www.reddit.com/r/SacredGeometry/comments/izwuuc/golden_ratio/

<https://thesmarthappyproject.com/fibonacci-in-a-sunflower/>

Visual Hierarchy

Golden Ratio – the divine proportion

Image Credit: <https://www.nngroup.com/articles/golden-ratio-ui-design/>
<https://apiumhub.com/tech-blog-barcelona/golden-ratio-in-web-design/>

Visual Hierarchy

Golden Ratio

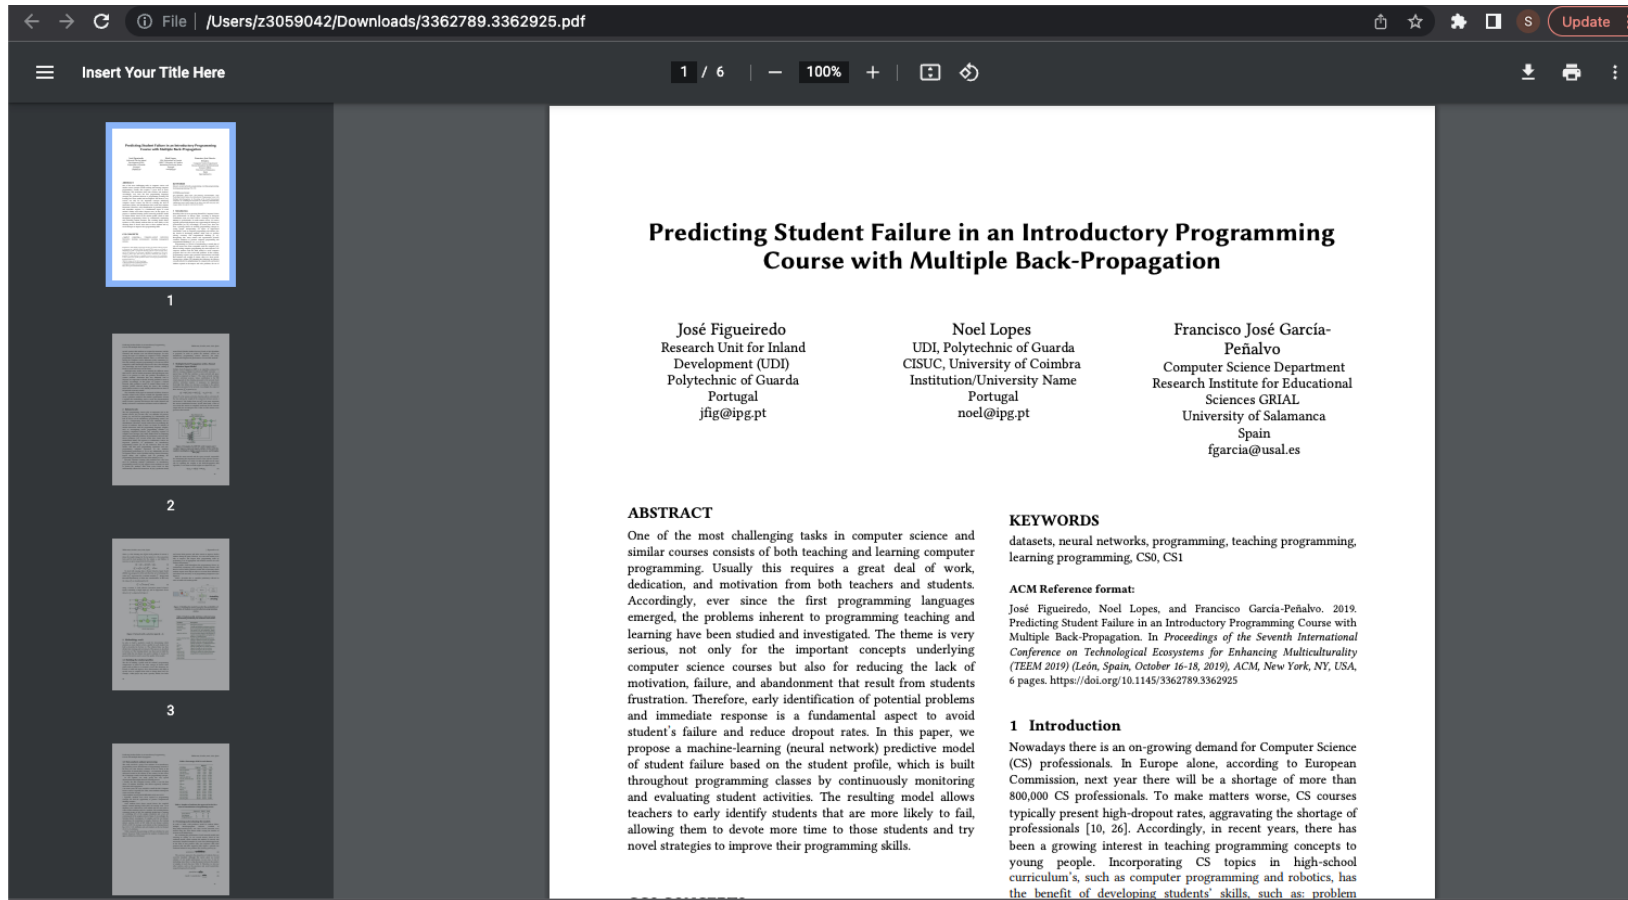

Visual Hierarchy

Perspective

- Can create an illusion of depth, with larger elements appearing closer (more important!)

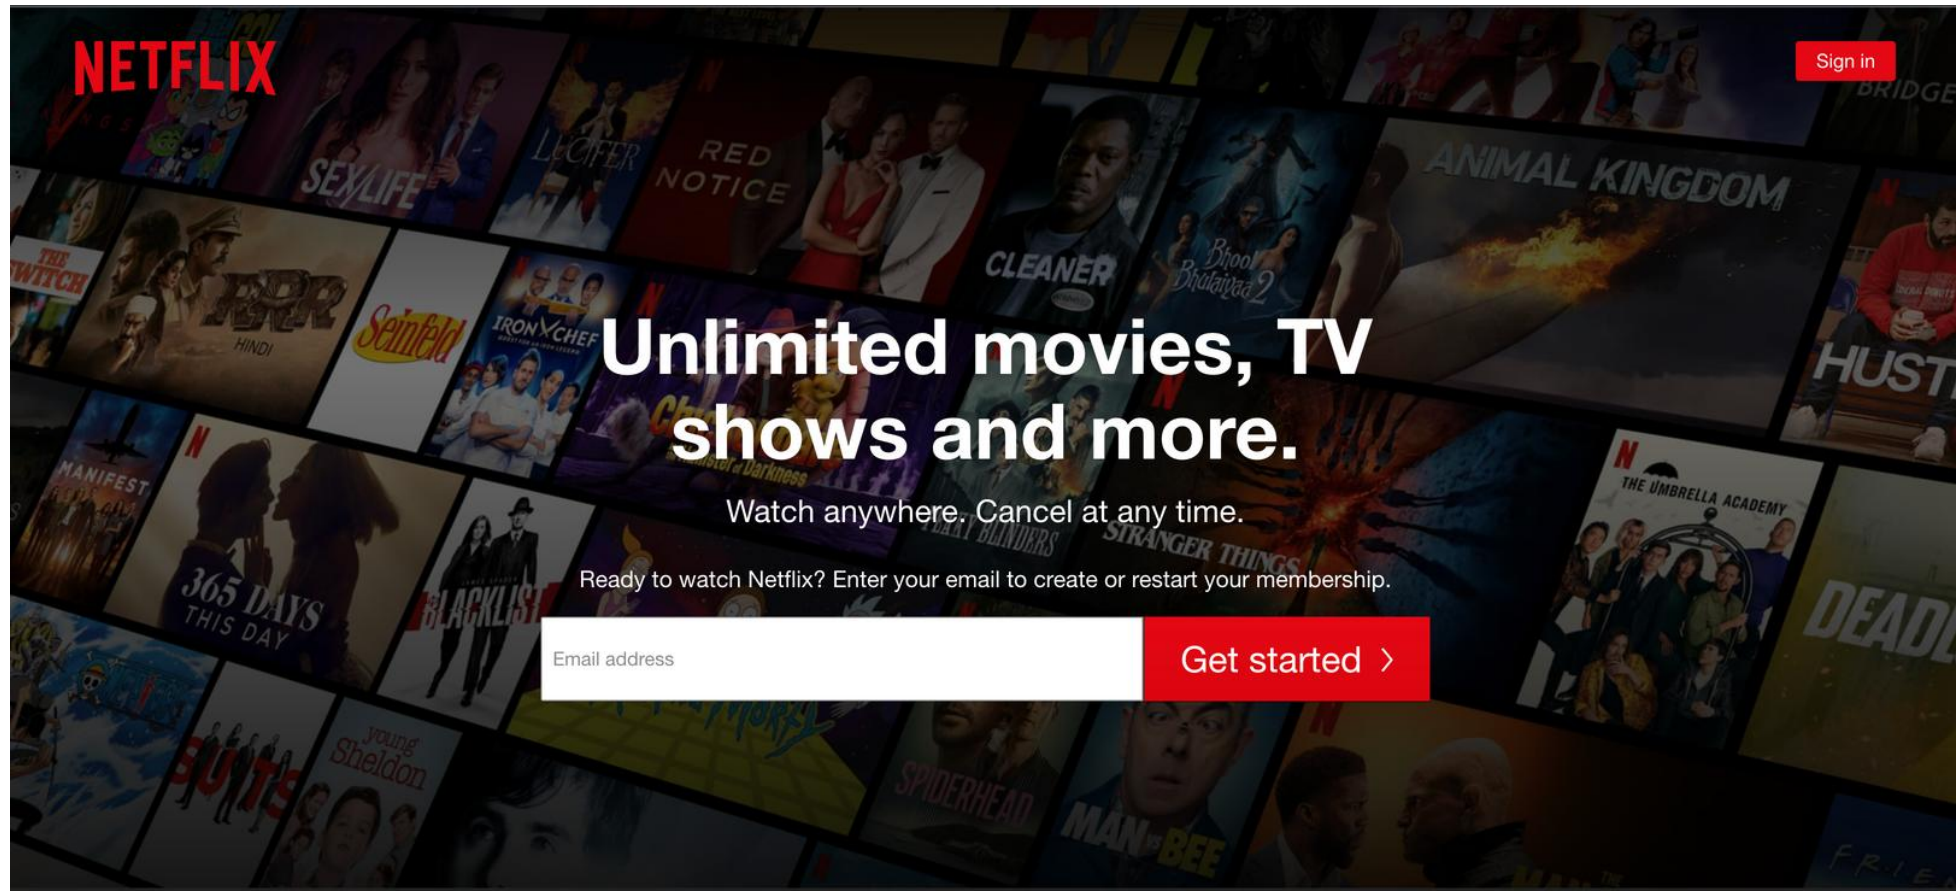

Visual Hierarchy

Perspective

Visual Hierarchy

Perspective

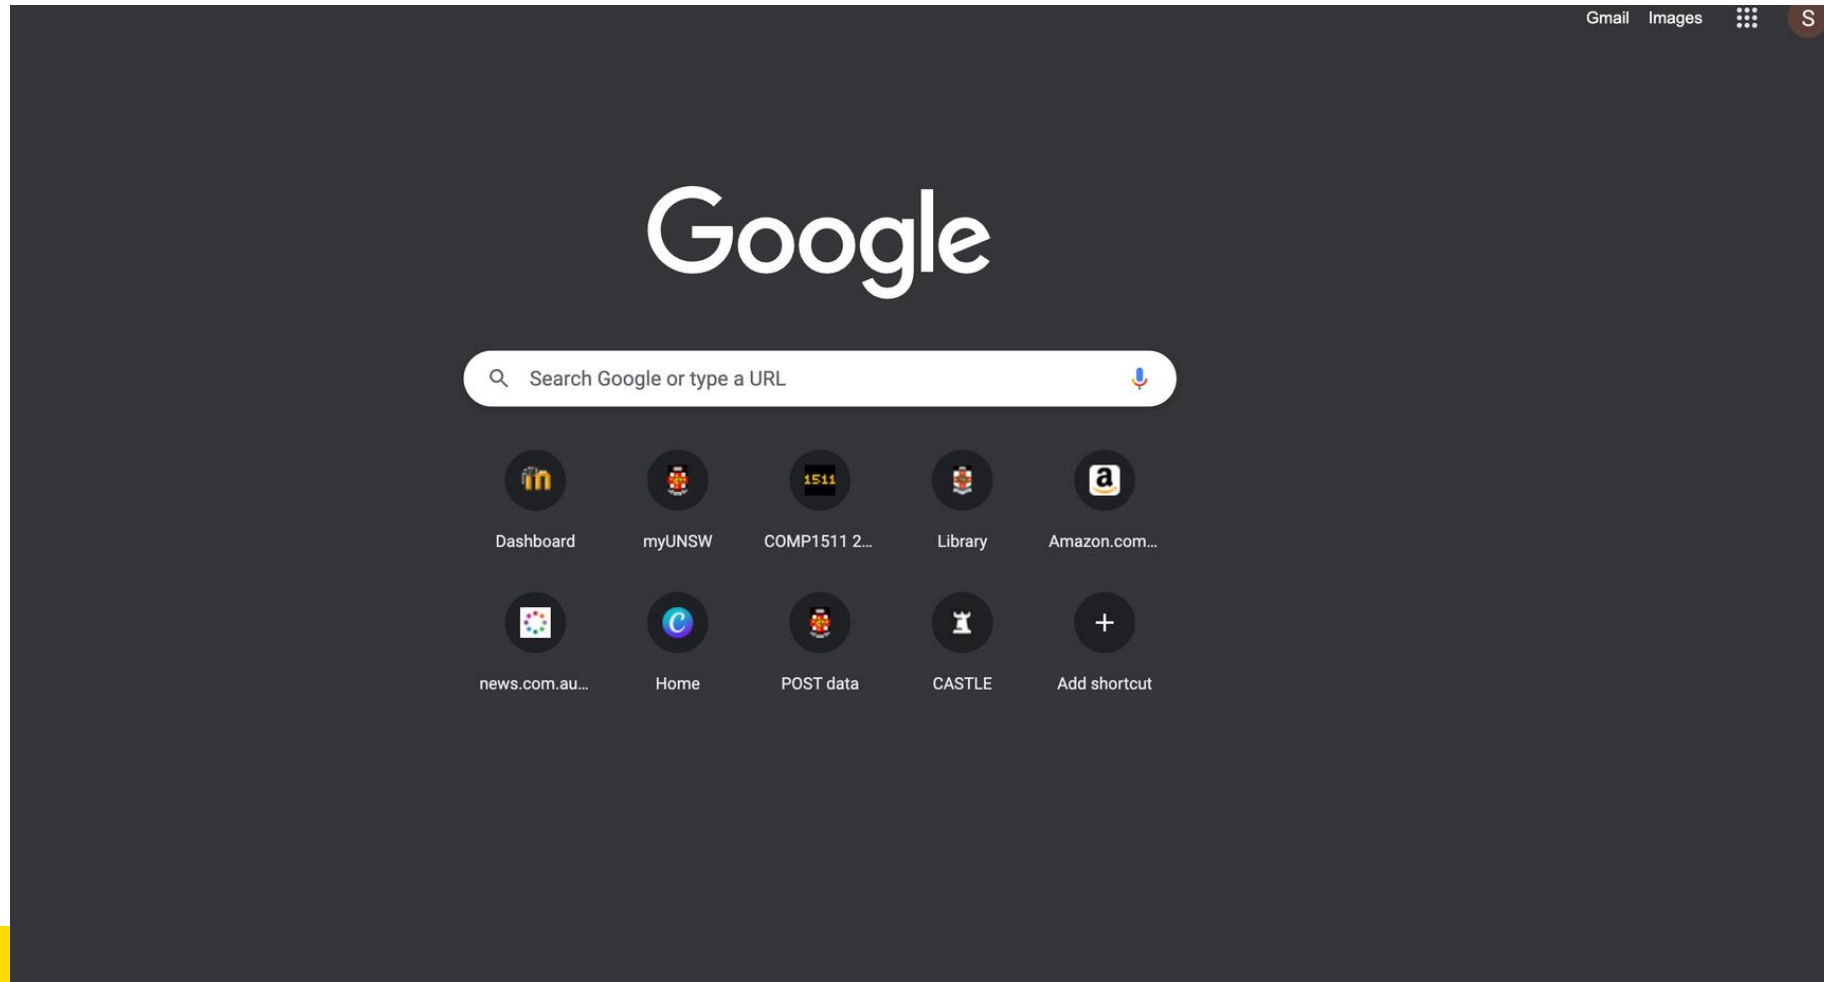

Visual Hierarchy

Focal Point

- The focal point is the most prominent element on a page - this is often where a user starts out by looking at...

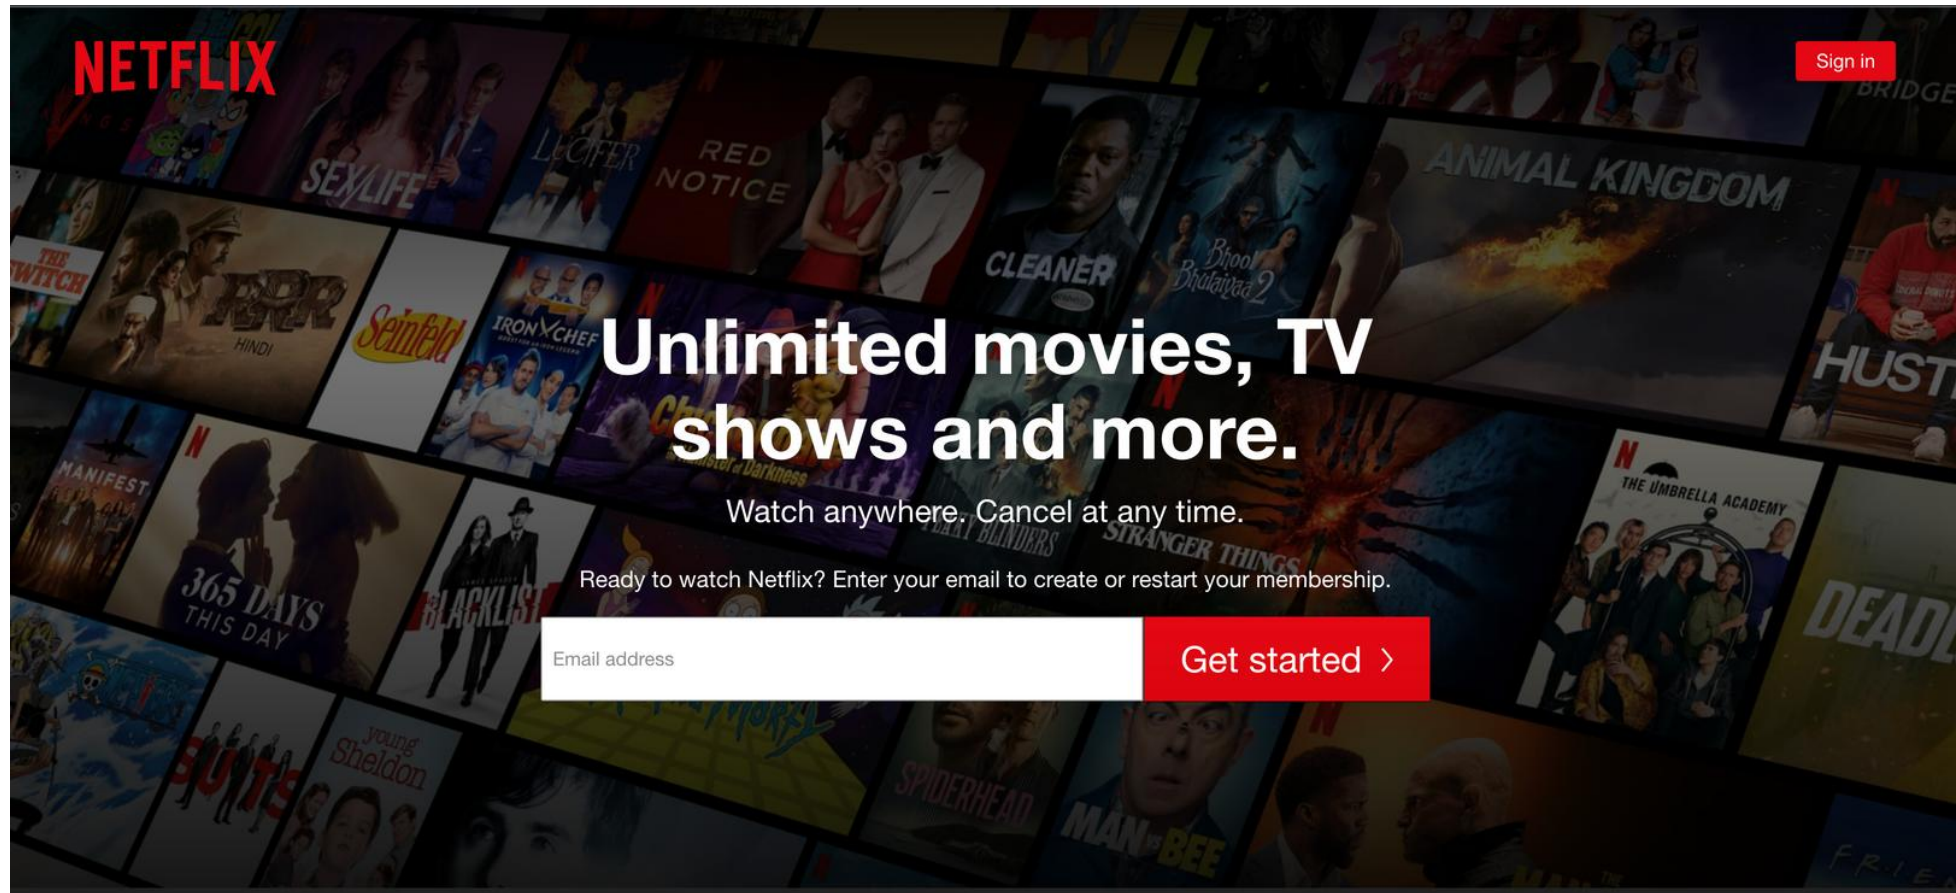

Visual Hierarchy

Focal Point

Visual Hierarchy

Focal Point

Visual Hierarchy

Balance

- Balancing the elements on a page - usually some type of symmetry
 - Symmetry is not always the most aesthetically pleasing, but is probably easier to achieve well than asymmetry

Visual Hierarchy

Balance

Colour Contrast

Accessibility Considerations with colour

The image displays two side-by-side login forms to illustrate the importance of color contrast in user interface design. Both forms have a light gray background and a blue 'Submit' button at the bottom. The left form features input fields with green borders, while the right form features input fields with gold borders. The text labels for the fields are in a dark gray font. The input fields contain the text 'John', 'Doe', 'john@email', and '****' for First Name, Last Name, Email, and Password respectively. The gold borders on the right form are significantly less visible than the green borders on the left form, demonstrating how poor color contrast can affect accessibility for users with visual impairments.

Field	Left Form (Green Border)	Right Form (Gold Border)
First Name	John	John
Last Name	Doe	Doe
Email	john@email	john@email
Password	****	****

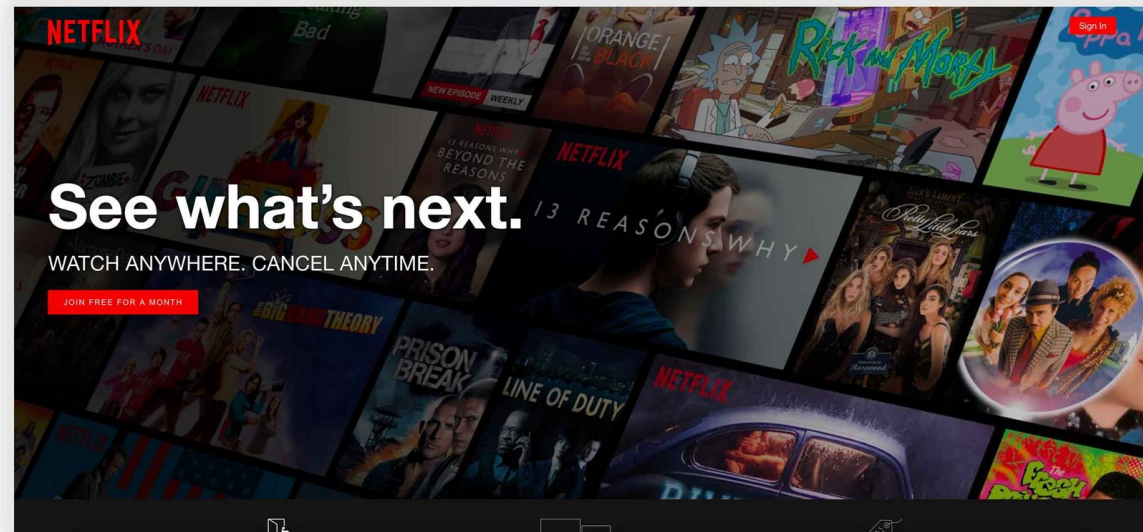

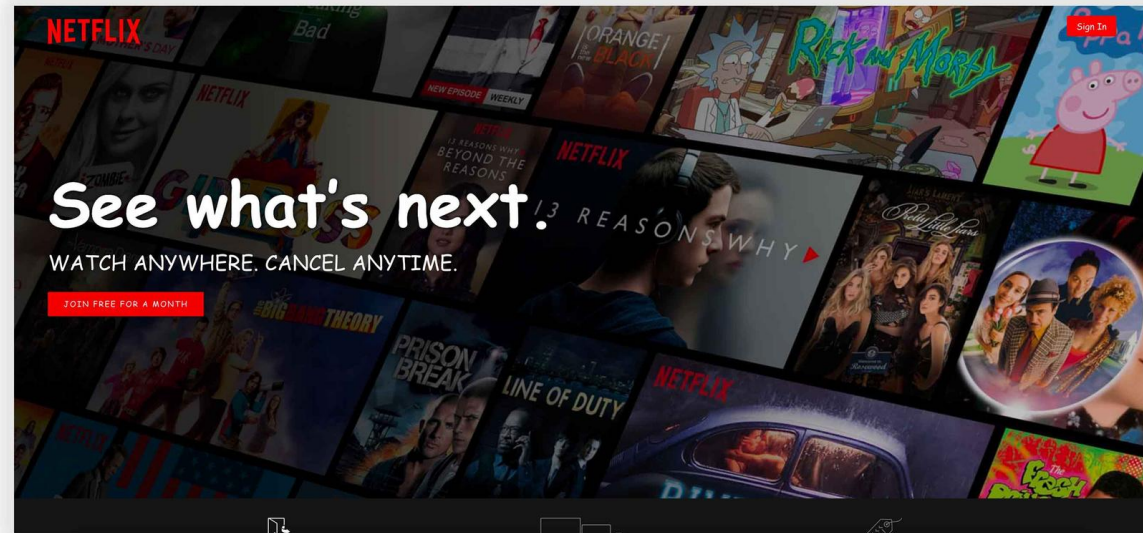

Image credit: <https://www.smashingmagazine.com/2018/02/comprehensive-guide-to-mobile-app-design/>

Typography

Typography

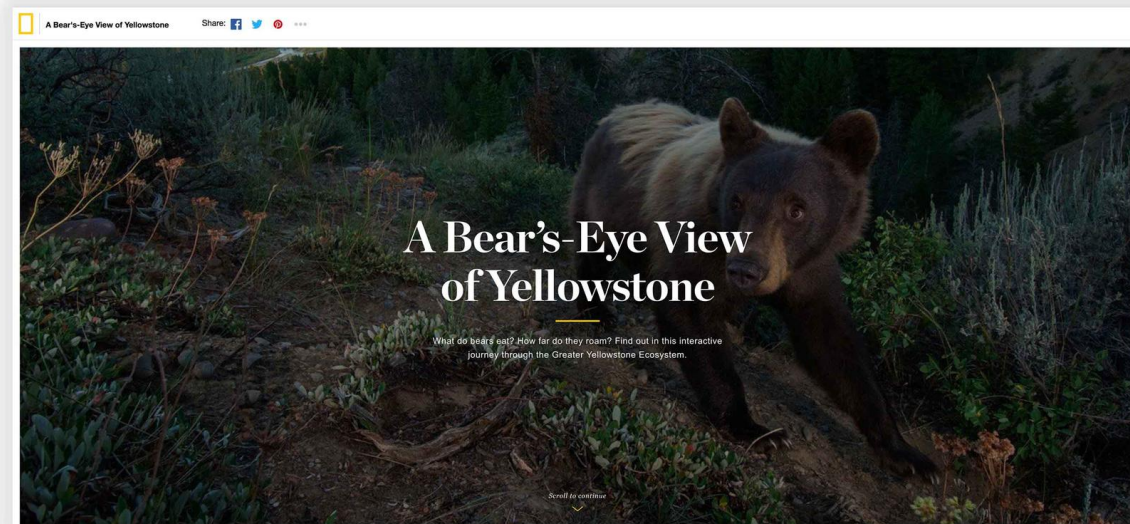

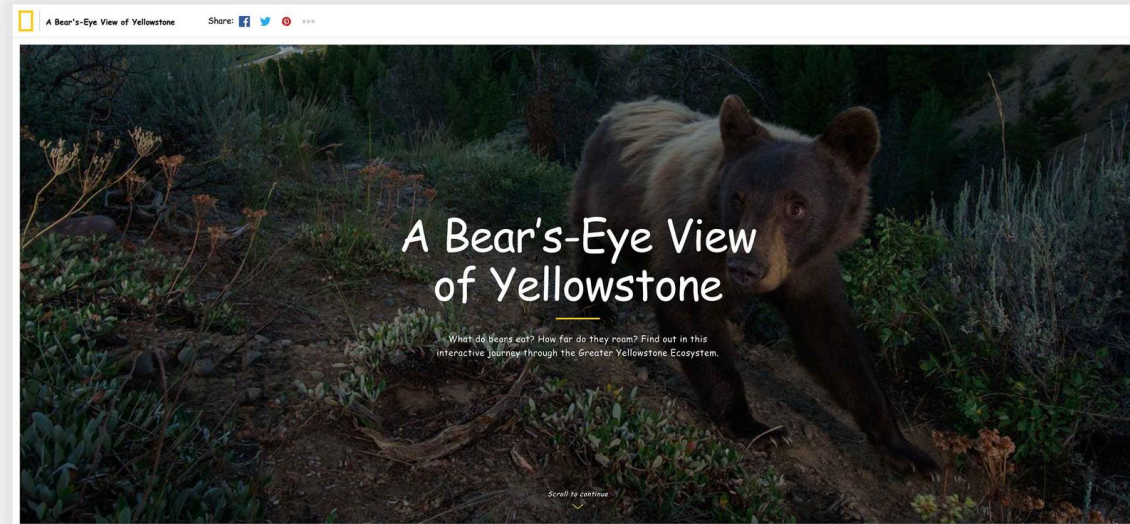

What if?

Typography

What if?

Credit: <https://madebysape.co.uk/web-design-blog/your-website-in-comic-sans/>

Fonts...

Why do we care?

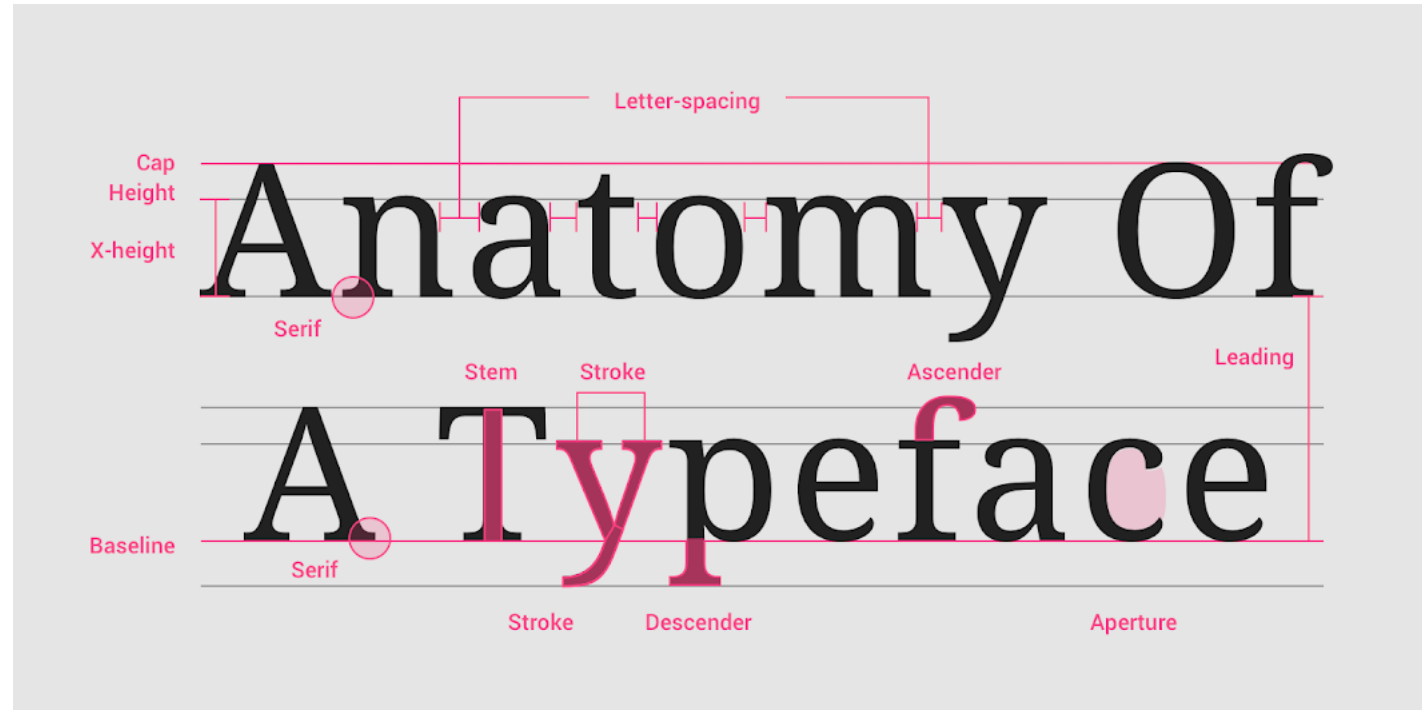

- Two main purposes:
 - Create aesthetic
 - Be legible and get your message across

Fonts...

Categories

- This is an example of a Serif font
- This is an example of a Sans Serif font
- **This is an example of a Decorative font**

Fonts...

Credit: <https://material.io/design/typography/understanding-typography.html#type-properties>

Fonts...

Basic principles for your prototypes :)

- Too many fonts spoils the broth *interface*
- Two fonts that compliment and contrast with each other
- Readability, legibility and accessibility are key
- Build hierarchy with text (coming)
- Can this font go to a different interface easily?
- Aesthetic consideration to fit in with context...

Fonts...

Basic principles for your prototypes :)

- Experiment with line height of 130-180% for optimal readability
- Limit line length to 70-80 characters
- Prioritise accessibility
 - Text size minimum of 16 (device specific but also context of font)
 - Colour contrast ratio 4.5:1 (more on this next week)
 - Do not rely on colour alone to convey information
 - Text size scaling must be able to go to 200% without killing readability and functionality
 - Do not use images of text unless it is absolutely necessary (such as a logo)

Fonts...

Basic principles for your prototypes :)

- Experiment with line height of 130-180% for optimal readability
- Limit line length to 70-80 characters
- To create your scale guide, you can use Material type scale generator:
 - Select your font
 - Establish base font size (such as 16pt)
 - Experiment with line height
 - Define your scale
 - Common scale is 1.250:1.414:1.5:1.618
 - Test test and test the scales!

<https://m2.material.io/inline-tools/typography/>

Fonts...

Basic principles
for your
prototypes :)

Many people don't realize that our eyes do not read character by character or even word by word.

Rather, our eyes scan a line, pausing momentarily to record groups of three or four words.

PERPETUA

Many people don't realize that our eyes do not read character by character or even word by word.

Rather, our eyes scan a line, pausing momentarily to record groups of three or four words.

OPTIMA

Many people don't realize that our eyes do not read character by character or even word by word.

Rather, our eyes scan a line, pausing momentarily to record groups of three or four words.

ITC AMERICAN TYPEWRITER

Image Credit:

https://cmscdn.fonts.com/documents/d56767212e650b2a/Fontology_LineLengthAndColumnWidth.pdf

All three of these text blocks set at 12 point have the same number of words per line, but the width of the columns varies with the font used.

Fonts...

Line length

The image shows a screenshot of a vacation rental listing page. A modal window titled "About this space" is open in the center. The background page shows a listing for a property with a 5.0 star rating and 7 reviews. The modal contains the following text:

About this space

This newly renovated 4-bedroom lakefront property is the perfect setup for your next family getaway. Featuring a swimming pool with SPA overlooking the stunning Tuggerah Lake. This property boasts relaxation and sunlight. Enjoy those winter days with your cup of coffee lounging in front of the gas fireplace or those scorching days with a cold drinks in the garden next to the pool. Continue through the house you will find the open sunroom and the fully equipped kitchen featuring new appliances.

The space

This exquisite holiday home is the perfect vacation to take a break and relax. In the main living area you can put up your feet and enjoy the big TV screen with Netflix or play with the pool table while enjoying the views of the pool and lake right outside. The sunroom is open with view for any weather, even in rainy days. The landscaped garden is available with direct lake access, a picnic table, timbered decking, a gas BBQ and a large bamboo gazebo right next to the pool.

Ducted air conditioning and ceiling fans are installed. You can still enjoy your stay with the temperature just right for you for any unexpected weather. Upload your holiday snaps with the complimentary wifi or relax on the deck with a cold drink while looking at the sunset over the lake. Whenever your hungry, feel free to use the fully equipped gourmet kitchen or enjoy the cool breeze as you enjoy your food that's sizzling on the BBQ.

If you feel like getting out of the house than there are many exquisite locations to visit within walking distance such as the Beachcombers Hotel (dining and bar) and Wallarah Point Peace Park (a fishing spot, boat ramp, a new children's park and even an outdoor exercise park). Supermarket and shopping strip is close to you within minutes for your convenience.

When it's time to hit the hay after a long day you'll find a master bedroom and the 2nd room with a king bed, 3rd room with a double bed, and 4th room with 2 x double beds. For extra guests there are sofa beds available in the 1st living room. Air conditioning with heating and cooling is available to

The background page also shows a section titled "Where you'll sleep" with a photo of a bedroom and the text "Bedroom 1 1 king bed".

Web Style Guide

2ND EDITION

Alignment

Margins define the reading area of your page by separating the main text from the surrounding environment. Margins provide important visual relief in any document, but careful design of margins and other "white space" is particularly important in Web page design because Web content must coexist on the computer screen with the interface elements of the browser itself and with other windows, menus, and icons of the user interface.

Web content must share the screen with other user interface elements

Margins and space can be used to delineate the main text from the other page elements. And when used consistently, margins provide unity throughout a site by creating a consistent structure and look to the site pages. They also add visual interest by contrasting the positive space of the screen (text, graphics) from the negative (white) space.

Text blocks have different ways of sitting within margins. Left-justified, centered, right-justified, and justified text are the alignment options available on the Web.

Justified text

Justified text is set flush with the left and right margins. Justified blocks of text create solid rectangles, and block headings are normally centered for a symmetrical, formal-looking document. In print, justification is achieved by adjusting the space between words and by using word hyphenation. Page layout programs use a hyphenation dictionary to check for and apply hyphenation at each line's end and then adjust word spacing throughout the line. But even with sophisticated page layout software, justified text blocks often suffer from poor spacing and excessive

Alignment

Left aligned

Alignment or flushness, is the process of placing text in relation to one or both margins. You set the alignment in the style object for glyph and text shapes, not for layout shapes.

Justification, is the process of typographically “stretching” or “shrinking” a line of text to fit within a given width. Your application can set the width of the space in which the line of text should appear; the text system then distributes the white space available on the line between words or even between glyphs, depending on the level of justification your application or the user chooses.

Centered

Alignment or flushness, is the process of placing text in relation to one or both margins. You set the alignment in the style object for glyph and text shapes, not for layout shapes.

Justification, is the process of typographically “stretching” or “shrinking” a line of text to fit within a given width. Your application can set the width of the space in which the line of text should appear; the text system then distributes the white space available on the line between words or even between glyphs, depending on the level of justification your application or the user chooses.

Right aligned

Alignment or flushness, is the process of placing text in relation to one or both margins. You set the alignment in the style object for glyph and text shapes, not for layout shapes.

Justification, is the process of typographically “stretching” or “shrinking” a line of text to fit within a given width. Anxiety and fears 

Anxiety in children is a normal part of childhood development. But it's estimated that 8-22% of children experience anxiety more intensely and more often than other children, stopping them
